Solaris The Chain Of Chance A Perfect Vacuum:

Solaris Stanisław Lem, 1985 **Solaris** Stanisław Lem, 1981 **Tragedy in Transition** Sarah Annes Brown, Catherine Silverstone, 2008-04-15 Tragedy in Transition is an innovative and exciting introduction to the theory and practice of tragedy Looks at a broad range of topics in the field of tragedy in literature from ancient to contemporary times Explores the links between writers from different times and cultures Focuses on the reception of classical texts in subsequent literatures and discusses their treatment in a range of media Surveys the lasting influence of the most resonant narratives in tragedy Contemplates exciting and unexpected combinations of text and topic among them the relationship between tragedy and childhood science fiction and the role of the gods **The Chain of Chance** Stanisław Lem, 2000 On a trail leading from Naples to Rome to Paris the ex astronaut barely escapes numerous threats on his life Having set himself up as a potential victim he realizes that he may now be the target of a deadly conspiracy and that the conspiracy is not the work of a criminal mind but a manifestation of the laws of nature The population has numerically exceeded its critical mass certain patterns have begun to emerge from the chaotic workings of society **The Poetic of Reason: Introducing Rational Poetic Experimentalism** Stefán Snævarr, 2022-09-26 This book makes the attempt to wed reason and the poetic The tool for this attempt is Rational Poetic Experimentalism RPE which is introduced and explored in this book According to RPE it makes sense to look for poetic elements in human reality including reason outside of the realm of imaginative literature Provocatively RPE contends that philosophy s search for truth has not been a great success so far So why not experiment with philosophical concepts and look for thought provoking ideas by employing the principles of RPE instead of fruitlessly searching for truths using conventional methods **Vital Reenchantments** Lauren Greyson, 2019 Not all charms fly at the touch of cold philosophy Vital Reenchantments examines so called cold philosophy or science that does precisely the opposite rather than mercilessly emptying out and unweaving it operates as a philosophy that animates More specifically Greyson closely examines how a specific group of poet in scientists of the late 1970s and 1980s directed attention to the wondrous unfolding of life at a time when the counter culture in particular had made the institution of science synonymous with technologies of alienation and destruction In this vein Vital Reenchantments takes up E O Wilson s Biophilia 1984 James Lovelock s Gaia 1979 and Carl Sagan s Cosmos 1980 in order to show how each work fleshes out scientific concepts with a unique attention to affective wonder understood as the experience of and attunement to novel effects What is so unique about these works is that they reenchant the scientific world without pandering to what Richard Dawkins will later term cosmic sentimentality Carl Sagan may have said We are made of starstuff but he would never insist as Joni Mitchell did in 1969 that we ve got to get ourselves back to the garden Instead they insist on a third way that does not rely on the idea of an ecological Eden a vigorously vital materialism in which the affective trumps the sentimental Further the historical emergence of these works all published within 5 years of each other was no accident each book responded to an ever deepening sense of

environmental crisis certainly but along with it they responded to perhaps more than marginally related narratives of the large scale disenchantment brought on by modernity or science and more often than not a mixture of the two Greyson argues that the persistence of these works and their affectively charged scientific concepts in contemporary popular culture and ecological thought is no accident As such these works deserve recognition as far more than popular science and can be seen as essential contributions to more contemporary vital materialist thought and ecological theory No doubt this talk of enchantment and wonder so tied to immediate experience can seem trivial in the face of any number of environmental crises global warming first among these that do not just appear ominously on the horizon but loom as never before The first task of this book thus to pose the same question that Jane Bennett does at the end of her own work on enchantment How can someone write a book about enchantment in such a world Does this approach really provide as Latour phrases it a way to bridge the distance between the scale of the phenomena we hear about and the tiny Umwelt inside which we witness as if it were a fish inside its bowl an ocean of catastrophes that are supposed to unfold Ultimately Vital Reenchantments argues that affective ecologies properly attended to point toward an open present one that broadens the horizons of the fish bowl and allows us to imagine engendering futures that are neither naively hopeful nor hopelessly apocalyptic

Psychoanalytic Perspectives on Virtual Intimacy and Communication in Film Andrea Sabbadini, Ilany Kogan, Paola Golinelli, 2018-09-03

Psychoanalytic Perspectives on Virtual Intimacy and Communication in Film brings together a group of psychoanalysts to explore through film the new forms of communication mainly the internet that enter more and more frequently into the affective lives of people their intimacy and even the analytic room The contributors all practising psychoanalysts analyse the potential and surprising transformations that human relationships including psychoanalysis are undergoing At present it is difficult to value the future importance and predict the possible disquieting consequences of the use and abuse of the new technologies we run the risk of finding ourselves unprepared to face this revolutionary transformation in human connections and affects Will it be possible in a near future that human beings prefer to fall in love with a machine gifted with a persuasive voice instead of a psychoanalyst in person The contributors explore the idea that virtual intimacy could begin to replace real life in sentimental and psychoanalytic relationships Imagination and fantasy may be strengthened and may ultimately prevail over the body excluding it entirely Can the voice of the analyst sometimes transmitted only by telephone or computer produce a good enough analytic process as if it were in person or will it help to foster a process of idealisation and progressive alienation from real life and connections with other human beings The film *Her* 2013 alongside others offers a wonderful script for discussing this matter because of the deep and thoughtful examination of love and relationships in the contemporary world that it provides *Psychoanalytic Perspectives on Virtual Intimacy and Communication in Film* will be of great interest to all psychoanalysts and psychoanalytic psychotherapists interested in the ongoing impact of technology on human relationships

Solaris Stanisław Lem, 1987 Kris Kelvin lands on the space station Solaris only to face a cruel miracle

World-Games Christopher Nash, 2024-10-31 Contemporary readers face a literature that seems to speak for them yet they often struggle to say just how or why Out of the deluge of works from such writers as Barth Barthelme Beckett Borges Brooke Rose Burroughs Butor Calvino Cortázar Federman Fuentes Le Guin Márquez McElroy Nabokov O'Brien Pynchon Robbe-Grillet Sanguinetti Sarraute Sollers Sukenick Tolkien Vonnegut new words and world models that demand understanding fill the air Yet they seem frequently beyond reach because the framework of ideas within which this often brilliant but seemingly bewilderingly disparate flood of discourses might make sense remains largely unexpressed Beginning with the first concisely concerted assessment in English of the premisses and practice of Realism as viewed by those who feel that there is no choice but to move on this book first published in 1987 confronts the vocabulary and rhetoric of current radical theory with the actual procedures of post war fiction In a spirit of challenging experiment it scrutinizes the themes motifs and strategies of contemporary narrative and reveals an unsuspected continuity of hitherto concealed premisses and dilemmas built into recent postmodern and poststructuralist thought As provocative as the literature it regards it proposes that anti Realism is no longer merely a movement that it has become a massive and equally conventionalized and problematical tradition living alongside Realism throughout the Western world

Chaos and Order N. Katherine Hayles, 2014-12-10 The scientific discovery that chaotic systems embody deep structures of order is one of such wide ranging implications that it has attracted attention across a spectrum of disciplines including the humanities In this volume fourteen

theorists explore the significance for literary and cultural studies of the new paradigm of chaotics forging connections between contemporary literature and the science of chaos They examine how changing ideas of order and disorder enable new readings of scientific and literary texts from Newton's Principia to Ruskin's autobiography from Victorian serial fiction to Borges's short stories N Katherine Hayles traces shifts in meaning that chaos has undergone within the Western tradition suggesting that the science of chaos articulates categories that cannot be assimilated into the traditional dichotomy of order and disorder She and her contributors take the relation between order and disorder as a theme and develop its implications for understanding texts metaphors metafiction audience response and the process of interpretation itself Their innovative and diverse work opens the interdisciplinary field of chaotics to literary inquiry *Memoirs of a Space Traveler* Stanisław Lem, 2000 Ijon Tichy is an ordinary space traveler whose extraordinary curiosity leads him to the very fringes of science Their plans are grandiose the bargains they make too often Faustian for the ends these scientists pursue concern humanity's greatest and most ancient obsessions immortality artificial intelligence and top of the line consumer items By turns philosophical satirical and absurd Lem's stories follow Ijon's adventures as both an observer of and participant in strange experiments Faulty time machines intelligent washing machines suicidal potatoes Ijon Tichy navigates them all with common sense and in so doing shows why he endures as one of Lem's most popular characters The British Library General Catalogue of Printed Books 1976 to 1982 British Library, 1983 **Confessions of Zeno** Italo Svevo, 1964 An elderly man undergoing psychoanalysis records his autobiography and disillusioned impressions of his analyst's methods Fiction in French - Fiction in Soviet British Library, 2013-02-07 No detailed description available for Fiction in French Fiction in Soviet Science Fiction and Fantasy Literature, 1975-1991 R.
