Soldiering Yesterday:

Yesterday's Soldiers Frederick M. Nunn, 1983-01-01 Between 1880 and World War II South America experienced the unsettling first stages of modernization During this half century of economic political and social change the armies of Argentina Brazil Chile and Peru underwent a process of professionalization as European military missions transformed their officer corps into copies of French and German officialdom In so doing European officers inculcated their ideals and values thought and self perception their professionalism in countries historically vulnerable to militarism Based mainly on a comprehensive examination of European and South American military literature this study describes the significant contribution of European military professionalism to South American professional militarism Nunn not only details the workings of the French missions in Brazil and Peru and the German missions in Argentina and Chile but gives great emphasis to the themes and topics that most concerned the European mentors and their overseas disciples He demonstrates convincingly that much of their professional literature was based on a yearning for an idealized past discontent with an unsatisfactory present and apprehension about a future that might threaten the most cherished of traditional officer corps principles and aims The study ends with World War II yet it makes an important contribution to our understanding of South American history since 1940 The military organizations of the four countries considered here confronted what they perceived to be the major problems of their modernizing nations with solutions learned from their European teachers Since 1940 they have resorted to golpes de estado most notably the post 1964 institutional golpes in order to impose forcibly some of those same solutions Thus despite increased U S influence many of the programs implemented by military regimes in the latter half of this century bear the indelible stamp of yesterday's soldiers

Military Ethics Today Sebastian Farnham, 2025-03-04 *Military Ethics Today* examines the critical role of ethical principles in modern warfare questioning whether they are truly upheld amidst the harsh realities of armed conflict It explores the evolution of military ethics from ancient codes to the Geneva Conventions highlighting the necessity of adapting ethical frameworks to address contemporary challenges like cyber warfare and autonomous weapons The book argues that a proactive values driven approach emphasizing continuous education and international cooperation is crucial for mitigating ethical risks in modern conflict especially given that the erosion of ethical standards can undermine peace and stability The book progresses by first introducing core ethical concepts such as distinction proportionality and necessity alongside legal frameworks governing armed conflict It then delves into specific ethical dilemmas including the protection of non combatants in urban warfare and the implications of targeted killings By exploring these issues through historical case studies legal analyses and empirical research the book offers a practical framework for military professionals policymakers and citizens to navigate the ethical complexities of twenty first century warfare It underscores the importance of ethical training and leadership within military institutions alongside robust international accountability
