Russia in the Early Modern World Donald Ostrowski,2022-01-25 A fundamental problem in studying early modern Russian history is determining Russia's historical development in relationship to the rest of the world The focus throughout this book is on the continuity of Russian policies during the early modern period 1450-1800 and that those policies coincided with those of other successful contemporary Eurasian polities The continuities occurred in the midst of constant change but neither one nor the other continuities or changes alone can account for Russia's success Instead Russian rulers from Ivan III to Catherine II with their hub advisors managed to sustain a balance between the two During the early modern period these Russian rulers invited into the country foreign experts to facilitate the transfer of technology and know how mostly from Europe but also from Asia In this respect they were willing to look abroad for solutions to domestic problems Russia looked westward for military weaponry and techniques at the same time it was expanding eastward into the Eurasian heartland The ruling elite and by extension the entire ruling class worked in cooperation with the ruler to implement policies The Church played an active role in supporting the government and in seeking to eliminate opposition to the government

Spanning more than a century of conflict the book considers challenges the Ottoman government faced from both neighbouring Catholic Habsburg Austria and Orthodox Romanov Russia as well as arguably more importantly from military intellectual and religious groups within the empire Using close analysis of select campaigns Virginia Aksan first discusses the Ottoman Empire s changing internal military context before addressing the modernized regimental organisation under Sultan Mahmud II after 1826 Featuring illustrations and maps many of which have never been published before *The Ottoman Wars* draws on previously untapped source material to provide an original and compelling account of an empire near financial and societal collapse and the successes and failures of a military system under siege The book is a fascinating study of the decline of an international power raising questions about the influence of culture on warfare *The Military History of Tsarist*

The Northern Wars Robert I. Frost, 2014-09-25 This book provides an accessible study of the neglected but highly important series of wars fought for control of the Baltic and Northeastern Europe during the period 1558-1721. It is the first comprehensive history which considers the revolution in military strategy which took place in the battlefields of Eastern Europe. Robert Frost examines the impact of war on the very different social and political systems of Sweden, Denmark, Poland, Lithuania and Russia and he explains why it was Russia that emerged victorious from these wars. Based on extensive primary and secondary research including much material that is unfamiliar in English, this book makes an important contribution to the debate on military change and political development in early modern Europe.

Eurasian Slavery, Ransom and Abolition in World History, 1200-1860 Christoph Witzel, 2016-03-09 Recent research has demonstrated that early modern slavery was much more widespread than the traditional concentration on plantation slavery. In the context of European colonial expansion, it would suggest that slavery and slave trading, though little researched, were common across wide stretches of Eurasia and a slave economy played a vital part in the political and cultural contacts between Russia and its Eurasian neighbours. This volume concentrates on captivity, slavery, ransom and abolition in the vicinity of the Eurasian steppe from the early modern period to recent developments and explores their legacy and relevance down to the modern times. The contributions centre on the Russian Empire while bringing together scholars from various historical traditions of the leading states in this region including Poland, Lithuania and the Ottoman Empire and their various successor states. At the centre of attention are transfers, transnational fertilizations and the institutions, rituals and representations facilitating enslavement, exchanges and ransoming. The essays in this collection define and quantify slavery covering various regions in the steppe and its vicinity and looking at trans-cultural issues and the implications of slavery and ransom for social, economic and political connections across the steppe. In so doing, the volume provides both a broad overview of the subject and a snapshot of the latest research from leading scholars working in this area.
