## **Solicitors And Divorce:**

Divorce Lawyers and Their Clients Austin Sarat, William L. F. Felstiner, 1995-08-03 Each year more than 2 million Americans get divorced and most of them use a lawyer In closed door conversations between lawyers and their clients strategy is planned tactics are devised and the emotional climate of the divorce is established Do lawyers contribute to the pain and emotional difficulty of divorce by escalating demands and encouraging unreasonable behavior Do they take advantage of clients at a time of emotional difficulty Can and should clients trust their lawyers to look out for their welfare and advance their long term interests Austin Sarat and William L F Felstiner s new book based on a pioneering and intensive study of actual conferences between divorce lawyers and their clients provides an unprecedented behind the scenes description of the lawyer client relationship and calls into question much of the conventional wisdom about what divorce lawyers actually do *Divorce Lawyers and Their Clients* suggests that most divorces are marked less by a pattern of aggressive advocacy than by one of inaction and drift It uncovers reasons why lawyers find divorce practice frustrating and difficult and why clients frequently feel dissatisfied with their lawyers This new work provides a unique perspective on the dynamics of professionalism It charts the complex and shifting ways lawyers and clients negotiate their relationship as they work out the strategy and tactics of divorce Sarat and Felstiner show how both lawyers and clients are able to draw on resources of power to set the agenda of their interaction while neither one is fully in charge Rather power shifts between the two parties where it is achieved power is found in the ability to have one s understandings of the social and legal worlds of divorce accepted Power then works through the creation of shared meanings *Divorce Lawyers and Their Clients* examines the effort to create such shared meanings about the nature of marriage and why marriages fail the operation of the legal process and the best way to bring divorces to closure It will be fascinating reading for anyone who is going through a divorce or has gone through one as well as for lawyers judges and scholars of law and society

Law and Parenthood Chris Barton, Gillian Douglas, 1995-05 Most academic literature focuses on the position of the child in relation to the parent or the state In reality the law is more concerned with the role and function of parents and this new book addresses the key issues of parental rights and responsibilities

*Lawyers and Mediators* Mavis Maclean, John Eekelaar, 2016-02-25 Do lawyers make matters worse or do they provide information advice and support which can help to prevent disputes arising or manage them when they do Do mediators enable parties to communicate and reach agreements tailor made to their needs Or working outside the legal framework do they find it difficult to protect weaker parties and access expert advice What happens when lawyers become mediators This book will describe the structure of service provision and the day to day work of lawyers mediators and lawyer mediators drawing on empirical work carried out between 2013 and 2015 immediately after the recent changes to the management of divorce and separation within the family justice system The reduction in legal aided help in 2013 and the failure of mediation to fill the gap in 2014 15 have given rise to a difficult debate This book aims to provide an

account of some of the practical effects of these policies through a description of the daily work of practitioners in the sector It raises the question of whether we need to choose between traditional legal services and the new processes of private ordering or whether intermediate positions might be possible      *Conciliation in Separation and Divorce* Lisa

Parkinson,2023-07-05 Originally published in 1986 reissued here with a new preface this study of the origins and early development of family conciliation services in Britain outlines their philosophy methods of work and reported results illustrated with case examples The examples demonstrate that disputes between separating and divorcing couples involve complex personal and family problems as well as legal ones and that the practice of conciliation needed to be set in the context of current changes in family law and court procedures At the time many solicitors and courts were adopting a settlement seeking approach in matrimonial cases rather than a sharply adversarial one and the complementary roles of solicitors and conciliators gave rise to dilemmas in practice as well as offering potential advantages This book draws a parallel between the work of ACAS in industrial disputes and the similar approach of family conciliation services but points out that there are also major differences It also shows how the experience of conciliation practice gained in other countries throws some useful light on the questions being raised in Britain Research findings from Australia Canada and the United States are used in discussing the future of conciliation in the short and longer term and in looking at the possible development of alternative methods of resolving disputes      **Delivering Family Justice in the 21st Century** Mavis

Maclean,John Eekelaar,Benoit Bastard,2015-08-27 Family justice requires not only a legal framework within which personal obligations are regulated over the life course but also a justice system which can deliver legal information advice and support at times of change of status or family stress together with mechanisms for negotiation dispute management and resolution with adjudication as the last resort The past few years have seen unparalleled turbulence in the way family justice systems function These changes are associated with economic constraints in many countries including England and Wales where legal aid for private family matters has largely disappeared But there is also a change in ideology in a number of jurisdictions including Canada towards what is sometimes called neo liberalism whereby the state seeks to reduce its area of activity while at the same time maintaining strong views on family values Legal services may become fragmented and marketised and the role of law and lawyers reduced while self help web based services expand The contributors to this volume share their anxieties about the impact on the ability of individuals to achieve fair and informed resolution in family matters      **Family**

**Alternative Perspectives on Lawyers and Legal Ethics** Reid Mortensen, Francesca Bartlett, Kieran Tranter, 2010-09-13 The study of legal ethics and the legal profession has emerged as a distinct and important field of scholarship over the last 30 years However as in other disciplines academic recognition can in turn entrench static and powerful meta theories and narratives about professional ethos and practise this collection seeks to disrupt this homogenising impulse and to present alternative voices by bringing together a range of international scholars writing about legal ethics and the legal profession The book features significant and timely contributions which take contemporary and non mainstream perspectives on the current and future shape of the legal profession The essays not only describe the rapidly changing profession but canvas different approaches to scholarship on the legal profession The collection seeks to explore a diverse and contextualised profession from a number of angles Authors examine how the public sees lawyers and how lawyers see their own profession how we practise law and how this practice shapes lawyers how such cultural and professional practice intersects with institutional structures of the law to create certain legal outcomes and how we regulate the legal profession to modify or institute ethical practice The volume provides insights into legal culture and ethics from the perspective of authors from Australia Canada England the United States New Zealand and Kenya a diversity of national perspectives that give valuable insights into developments in the profession at the local and global level It also illustrates diversity within the profession by tracing differing professional career trajectories based on raced or gendered barriers alternative ethical strategies and the impact of organisational cultures in which lawyers practice

**The Solicitors' Journal**, 1928

*Deserted Wives and Economic Divorce in 19th-Century England and Wales* Jennifer Aston, Olive Anderson, 2024-11-14 This book considers Section 21 of the Divorce and Matrimonial Causes Act 1857 and its significant

impact on previously invisible married women in the 19th century Tens of thousands of women used this little known section of the Act to apply for orders from local magistrates courts to reclaim their rights of testation inheritance property ownership and dependent on local franchise qualifications ability to vote By examining the orders that were made and considering the women who applied for them the book challenges the mistaken belief that Victorian England and Wales were nations of married cohabiting couples The detailed statistical analysis and rich case studies presented here provide a totally new perspective on the legal status and experiences of married women in England and Wales Although many thousands of orders were granted between 1858 and 1900 their details remain unknown and unexamined primarily because census records did not consistently record dissolved marriages and there is no central index of applications made Using sources including court records parliamentary papers newspaper reports census returns probate records and trade directories this book reconstructs the successful and unsuccessful experiences of women applying to magistrates courts and the Court for Divorce and Matrimonial Causes to protect their assets across regions and decades
