

Accountability for Change: Solution-Focused Treatment With Domestic Violence Offenders

Mo Yee Lee, Adriana Uken, & John Sebold

ABSTRACT

In this article, the authors discuss and evaluate a solution-focused treatment program for domestic violence offenders. Building on a strengths perspective, a solution-focused approach holds a person accountable for solutions instead of focusing on problems. The outcome study was a 1-group pre- and posttest design with a 6-month follow-up to evaluate the effectiveness of a solution-focused group treatment program for 90 domestic violence offenders who were ordered by the court to receive treatment. Findings of the outcome study indicated a recidivism rate of 16.7% of program participants as based on official records over a 6-year period. There was a significant improvement in participants' relational skills in intimate relationships as evaluated by their spouses or partners and a significant increase in their self-esteem based on self-reports. Implications for treatment and research with domestic violence offenders are discussed.

Diverse responses have been instigated by society in an attempt to end domestic violence in intimate relationships that has plagued society and deeply hurt families and children. The early efforts of the battered women's movement in the 1970s to protect the victims and their children have been expanded to include legal sanction of domestic violence as well as provision of treatment for offenders (Roberts & Swanger, 2002; Schechter, 1982). Treatment programs for domestic violence offenders began as men's voluntary responses to the battered women's movement in an attempt to confront men's violence against women as a result of patriarchal beliefs. The first batterer program, EMERGE, was established in 1977 at the request of women working in Boston area shelters (Schechter, 1982). Currently, these treatment programs are incorporat-

ed as an integral part of the coordinated system response to domestic violence in which the courts routinely send domestic violence offenders to receive group treatment while on probation as an alternative to serving sentences. Despite the proliferation of batterer programs across the country, the search for effective treatment models that assist offenders to live a life free of violence presents a constant challenge for service providers.

Currently, the design of most treatment programs for domestic violence offenders is based on a cognitive-behavioral approach that mainly targets individual characteristics or problems contributing to violent behaviors (e.g., Geffner & Mantoosh, 1999; Saunders, 1996) and/or a feminist perspective that focuses on the sociocultural roots of domestic violence (e.g., Martin, 1976; Pence & Payman, 1993; Walker,

Solution-oriented Social Work Practice Gilbert J. Greene, Mo Yee Lee, 2011 Too often in practice there is a tendency to pathologize clients requiring a diagnosis as part of the helping relationship Suppose however that most of the client problems that social workers encounter have more to do with the vagaries of life and not with what clients are doing wrong This powerful idea is the philosophy behind the strengths based approaches to social work This groundbreaking practice handbook takes this concept one step further combining the different strengths based approaches into an overarching model of solution oriented social work for greater impact The strengths perspective emphasizes client strengths goal setting and a

shared definition of positive outcome Solution focused therapy approaches ongoing problems when they have temporarily abated amplifying exceptions as solutions This natural but rarely explored pairing is one component in the challenging and effective practice framework presented here by the authors two seasoned practitioners with over 50 years of combined experience By integrating the most useful aspects of the major approaches a step by step plan for action emerges With this text in hand you will Integrate elements from the strengths perspective solution focused therapy narrative therapy and the strategic therapy of the Mental Research Institute the MRI approach into an effective and eclectic framework Build and practice your skills using case examples transcripts and practical advice Equip yourself with the tools you need to emphasize clients strengths Challenge the diagnosis first medical model of behavioral health care Collaborate with clients to get past thinking first order change and more to acting outside the box second order change Learn to work with a wide variety of clients including individuals groups and families involuntary clients clients with severe mental illness and clients in crisis For any student or practitioner interested in working with clients towards collaborative and empowering change this is the essential text
