Soviet Military Aircrafts In Monino:

Soviet Strategic Bombers Jason Nicholas Moore, 2018-06-30 The history of Soviet strategic bombers after the Second World War is a fascinating one from the reverse engineering of interned American Boeing B 29 bombers into the first Soviet strategic bomber the Tu 4 to the huge jet and turbo prop powered aircraft of today s Russian Air Force This comprehensive history of these aircraft will deal not just with the development of aircraft that entered service but of experimental aircraft as well and projects that were never even built will also be explored The service life of these bombers will be covered including both active and retired aircraft and their use outside of the Soviet Union in places such as the Middle East and Afghanistan will be described in detail The Soviet Union built some of the first jet powered strategic bombers and the Tu 95 Bear the only swept winged turbo prop bomber to ever enter service remains in service to this day Less successful aircraft like the graceful but problem plagued supersonic Tu 22 Blinder and the Mach 3 Sukhoi T 4 will also be examined

Soviet Bombers of the Second World War Jason Nicholas Moore, 2019-09-08 Soviet bombers were a varied lot during the Second World War ranging from single engined biplanes such as the 1920 s era Polikarpov U 2 to the excellent and modern twin engined Tu 2 medium bomber Although the use of four engined strategic bombers was mostly limited to use of the huge Pe 8 bomber the Soviets used many other aircraft for both strategic and tactical bombing As the bombers of the Red Air Force were mainly tasked with supporting the Red Army most of the bombers were used for tactical bombing attacking tanks troop convoys trains and airfields This book will deal with both strategic bombers and tactical bombers but will concentrate on the smaller tactical bombers as this is where the Red Air Force s emphasis lay Such types as the Il 4 the Su 2 the aforementioned Tu 2 and the most important bomber of all the Il 2 Shturmovik attack bomber will be described in great detail including not only details on the aircraft themselves but how they were deployed in combat The one truly strategic bomber the Pe 8 will not be forgotten and neither will the comparatively tiny U 2 biplane which was so effective in its use as a night time nuisance raider that the Germans copied the tactic wholesale Accurate colour profiles in some number will accompany the text in this comprehensive work on Soviet bombers
