Soviet Natural Gas Development To 1990 The Implications For The CMEA And The West:

Soviet Natural Gas Development to 1990 Jonathan P. Stern, 1980 *Natural Gas and Geopolitics* David G. Victor, Amy M. Jaffe, Mark H. Hayes, 2006-06-29 By most estimates global consumption of natural gas a cleaner burning alternative to coal and oil will double by 2030 However in North America Europe China and South and East Asia which are the areas of highest expected demand the projected consumption of gas is expected to far outstrip indigenous supplies Delivering gas from the world's major reserves to the future demand centres will require a major expansion of inter regional cross border gas transport infrastructures This book investigates the implications of this shift utilizing historical case studies as well as advanced economic modelling to examine the interplay between economic and political factors in the development of natural gas resources The contributors aim to shed light on the political challenges which may accompany a shift to a gas fed world

Comecon J. J. Brine, 1992 Comecon or the Council for Mutual Economic Assistance was founded by Joseph Stalin in 1949 to counteract the Marshall Plan and reinforce the bonds between the Soviet Union and the people's democracies of Eastern Europe Other Soviet Bloc nations later joined Comecon and for forty years it dominated the trade policies of the Soviet Bloc and profoundly influenced their domestic economic development and relations with the West Comecon collapsed in 1991 after the countries of Eastern Europe rejected communism It was often compared with the West European Common Market but differed vastly in its aims structure powers and activities Its influence is a critical factor in assessing both the economic failures of the Soviet Bloc and the problems facing former member states as they make the transition to free market economies This detailed annotated bibliography is an essential guide to the extensive English language literature about Comecon from its founding until its demise Chapters cover Comecon's history structure and law socialist economic integration the organization's arrangements for international trade and finance environment natural resources and energy labor industry and agriculture science and technology Comecon like the rest of the Soviet Bloc collapsed suddenly but its legacy will color international relations and worldwide economic issues for years to come An understanding of its institutions mechanisms and policies remains vital in appreciating the economic organization of the former Soviet empire This bibliography will therefore be indispensable to policymakers economists historians and political scientists Energy Abstracts for Policy Analysis, 1984 Soviet Oil and Gas Exports to the West Jonathan P. Stern, 1987 Energy in Soviet Policy, 1981 **Cold War Energy** Jeronim Perović, 2017-02-28 This book examines the role of Soviet energy during the Cold War Based on hitherto little known documents from Western and Eastern European archives it combines the story of Soviet oil and gas with general Cold War history This volume breaks new ground by framing Soviet energy in a multi national context taking into account not only the view from Moscow but also the perspectives of communist Eastern Europe the US NATO as well as several Western European countries namely Italy France and West Germany This book challenges some of the long standing assumptions of East West bloc relations as well as shedding new light on relations within the blocs

regarding the issue of energy By bringing together a range of junior and senior historians and specialists from Europe Russia and the US this book represents a pioneering endeavour to approach the role of Soviet energy during the Cold War in transnational perspective **The Soviet Bloc, Energy, and Western Security** Jonathan B. Stein, 1983 **CAEM, Énergie, 1980-1990** North Atlantic Treaty Organization. Economics Directorate, 1981 *Consulting Energy* Arthur Mason, 2025-11-14 This book examines a shift in the terrain of energy politics that has given rise to consultant experts as new types of intermediaries capable of orienting crucial decision making influencing energy politics steering governance and envisioning energy futures Drawing on fieldwork at executive roundtables in global cities across North America and Europe the book examines the development and consolidation of consultant expertise as well as the opulent settings in which it is distributed By exploring the role of aesthetics and judgment in market oriented decision making the book explores elites expertise and ethics by highlighting the relationship between credibility and luxury The book also considers the enrolment of the expert in a kind of virtue ethics whereby adherence to neoclassical economic principles is taken to be a character trait worthy of emulation By adopting this analytic this book sheds light on the confidence that clients place in experts by drawing out the relationship between depersonalized quantitative approaches to energy markets and the virtue of the persons who propose them In turn the book discusses the implications of relying upon consultant experts to determine envision and govern energy futures This book will be useful for academics researchers and students interested in energy studies energy and environmental politics and policy energy and environmental governance anthropology and political science
