Lunar Science Yann Chemin, 2019-09-04 Lunar science is in the middle of a small revolution with now many new
countries sending orbiters landers and even sample return missions to the moon Additionally both governments and private
companies are now more and more considering the moon as a base for solar system exploration With such an increase in
attention lunar science is now encompassing several unified dimensions The first is the science of the moon itself its origin
evolution and inner composition The second is how humans can live on the moon covering biology and in general the logistics
of surviving there including surface mapping and in situ resource utilization
