Commercial Space Tourism Dirk C. Gibson, 2012 The general themes of this analysis of the commercial space tourism industry include three main topics 1

Benefits of commercial space tourism to numerous stakeholders 2 The viability of commercial space tourism 3 existing public relations solutions f The New Routledge Companion to Science Fiction Mark Boulton, Andrew M. Butler, Sherryl

Vint, 2024-06-13 The New Routledge Companion to Science Fiction provides an overview of the study of science fiction across multiple academic fields. It offers a new conceptualisation of the field today, marking the significant changes that have taken place in sf studies over the past 15 years. Building on the pioneering research in the first edition, the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print. It also updates and expands the range of frameworks that are relevant to the study of science fiction. The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context, including South Asian, Latin American, Chinese, and African diasporic science fiction. The contributors use both well-established critical and theoretical approaches and embrace a range of new ones, including biopolitics, climate crisis, critical ethnic studies, disability studies, energy humanities, game studies, medical humanities, new materialisms, and sonic studies. This book is an invaluable resource for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today. Chapter 39 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-NonCommercial-NoDerivatives (CC BY-NC-ND) 4.0 license. **Space Tourism Value Chain** Kang-Lin Peng, LokTeng Esther Kou, Hong Chen, 2024-03-22 This book benefits those interested in space tourism for doing business, conducting research, and teaching space services. The value chain analysis approach is applied to construct the knowledge system of the space industry from suppliers, consumers, agents, and related stakeholders. Space tourism has made a breakthrough in travel boundaries beyond Kármán line and impacted human living in many aspects, especially a vision of Mars immigration. The tourism industry has extended its reach to outer space. Space education has been popular in many countries because of human capital to serve in the new field. Researchers have developed unique methodologies to study space economic behaviors. The advancements in space technology and commercialization have formed a new market to drive a new era of space economics. Individuals can now venture beyond the Kármán line and fulfill their desire for space exploration through space tourism. This form of tourism offers a unique opportunity for individuals to explore the origins and limitations of human beings. This book provides an overview of the current state of global space tourism development, including its characteristics, direct and indirect stakeholders, and existing challenges. The successful implementation of space tourism cases by private enterprises in Europe and the USA offers valuable insights into China's space tourism endeavors. Given China's leading position in global space technology, space tourism represents a promising commercial development field that can benefit the country and its citizens. Space Tourism Erik Cohen, Sam Spector, 2019-09-06 This is the first comprehensive multi-disciplinary work on the emergent phenomenon of space tourism. It is written by leading specialists and covers a wide spectrum of topics, including space history and technology.

the environmental social and legal aspects of the development of a future space tourism industry and space tourism marketing

Space Enterprise Phillip Harris, 2009-12-29 In *Space Enterprise Living and Working Offworld* Dr Philip Harris provides the vision and rationale as to why humanity is leaving its cradle Earth to use space resources as well as pursuing lunar industrialization and establishing offworld settlements As a management space psychologist Dr Harris presents a behavioral science perspective on space exploration and enterprise In this his 45th book Phil has completely revised and updated the two previous editions of this classic placing new emphasis on the need for more synergy and participation by the private sector He not only provides a critical review of what is happening in the global space community but offers specific strategies for lunar economic development The author analyzes the human factors in contemporary and future space developments especially relative to the deployment of people aloft This user friendly volume offers numerous photographs diagrams exhibits and case studies

Space-Based Technologies and Commercialized Development: Economic Implications and Benefits Tkatchova, Stella, 2011-04-30 This book introduces the concept of space based technology commercialization and offers a first time analysis of plausible opportunities examining the overall marketability of tourism in outer space including business case studies on celestial solar power and space debris that demonstrate the potential of cosmic technologies in the context of interplanetary business Provided by publisher
