SOLAR SYSTEM

DATA:

PROCEDURE:

Using a cardboard we paste half of a foam ball previously painted according to the color of each planet.

We decorate the project with pieces of aluminum foil and glitter to simulate storms and stars that are in the sky.

Then we proceeded to search the internet for all the information on each planet, and finally proceeded to print all the information.

CONCLUSION:

The solar system is a collection of celestial bodies, including the Sun, planets, moons, and other objects, that are gravitationally bound to the Sun. The Sun is the central body of the solar system, and it is the source of most of the energy that powers the system. The planets are the large bodies that orbit the Sun, and they are the most prominent objects in the solar system. The moons are the smaller bodies that orbit the planets, and they are also important components of the solar system. Other objects in the solar system include comets, asteroids, and meteoroids. The solar system is a complex and fascinating system, and it is one of the most important parts of our universe.
