Abstract

Aims. Suicidal acts may cluster in time and space and lead to community concerns about further imitative suicidal episodes. Although suicide clusters have been researched in previous studies, less is known about the clustering of non-fatal suicidal behaviour (self-harm). Furthermore, most previous studies used crude temporal and spatial information, e.g., numbers aggregated by month and residence area, for cluster detection analysis. This study aimed to (i) identify space-time clusters of self-harm and suicide using daily incidence data and exact address and (ii) investigate the characteristics of cluster-related suicidal acts.

Methods. Data on emergency department presentations for self-harm and suicide deaths in Taipei City and New Taipei City, Taiwan, were used in this study. In all-age and age-specific analyses, self-harm and suicide clusters were identified using space-time permutation scan statistics. A cut-off of 0.10 for the *p* value was used to identify possible clusters. Logistic regression was used to investigate the characteristics associated with cluster-related episodes.

Results. A total of 5,291 self-harm episodes and 1,406 suicides in Taipei City (2004–2006) and 20,531 self-harm episodes and 2,329 suicides in New Taipei City (2012–2016) were included in the analysis. In the two cities, two self-harm clusters (*n* [number of self-harm episodes or suicide deaths in the cluster] = 4 and 8 in Taipei City), four suicide clusters (*n* = 3 in Taipei City and *n* = 4, 11 and 8 in New Taipei City) and two self-harm and suicide combined clusters (*n* = 4 in Taipei City and *n* = 8 in New Taipei City) were identified. Space-time clusters of self-harm, suicide, and self-harm and suicide combined accounted for 0.65%, 0.59%, and 0.08% of the respective groups of suicidal acts. Cluster-related episodes of self-harm and suicide were more likely to be male (adjusted odds ratio [aOR] = 2.22, 95% confidence interval [CI] 1.26, 3.89) and young people aged 10–29 years (aOR = 2.72, 95% CI 1.43, 5.21) than their cluster-unrelated counterparts.

Conclusions. Space-time clusters of self-harm, suicide, and self-harm and suicide combined accounted for a relatively small proportion of suicidal acts and were associated with some sex/age characteristics. Focusing on suicide deaths alone may underestimate the size of some clusters and/or lead to some clusters being overlooked. Future research could consider combining self-harm and suicide data and use social connection information to investigate possible clusters of suicidal acts.

Introduction

A space-time suicide cluster can be defined as multiple suicides that occur closer to each other in time and space than would be expected based on the expectation of the community or statistical chance (Robinson *et al.*, 2016a). One single suicide cluster could have a tremendous impact on the community and lead to serious concerns of imitation, i.e., further occurrences of suicide (Heffel *et al.*, 2015; Robinson *et al.*, 2016a, 2016b).

Previous studies of clusters of suicidal behaviour have mainly focused on suicide deaths (Benson *et al.*, 2022; Haw *et al.*, 2013; Niedzwiedz *et al.*, 2014; Robinson *et al.*, 2016a), although non-fatal suicidal behaviour may also occur as part of a cluster of suicide deaths, and the incidence of non-fatal suicidal behaviour can be 20-fold higher than that of fatal events (Fazel and Ramson, 2020). Not including non-fatal suicidal behaviour in the analysis may lead to many clusters of suicidal behaviour being overlooked.

Space Time And Self:

Space, Time, and Self, By E. Norman Pearson E. Norman Pearson, 1967 *Space, Time, and Self* E. Norman Pearson, 1967 **Theory of the Stationary Self-Consistent Universe** Avshalomov Alexander Shamailovich, Since the creation of GR and subsequent works in cosmology the question of the curvature of space in the Universe is considered one of the most important and debated to this day This is evident because the curvature of space depends whether the Universe expands contracts or is static These discussions allowed the author to propose a paradoxical idea simultaneous existence in the Universe of three interconnected space times positive negative and zero curvature and on this basis to develop a theory in which each space time plays its own role and develops in a strict accordance with its sign of curvature The three space time model of the structure of the Universe proposed by the author allows to solve many fundamental problems of modern cosmology and theoretical physics and creates the basis for building a unified physical theory including one that unites GR and quantum physics **Relativity and the Nature of Spacetime** Vesselin Petkov, 2009-06-23 This expanded second edition of *Relativity and the Nature of Spacetime* contains several major changes and a number of additions to different chapters Two chapters Chaps 6 and 7 which discussed two specific groups of arguments against the reality of spacetime have been transformed into appendices A and B Two new chapters Chaps 6 and 10 have been added Chapter 6 entitled *Why Is the Issue of the Nature of Spacetime So Important* elaborates on what was Sect 5.6 of the first edition and addresses some recent work on the nature of spacetime for example the growing or evolving block universe model of the world which has recently been lived by several physicists as what appears to be the last remaining alternative to the Minkowski absolute four dimensional world after it had become an undeniable fact that three dimensionalism or presentism contradicts the relativistic experimental evidence Chapter 10 entitled *Spacetime and the Nature of Quantum Objects* and based on what used to be Sects 6.2 and 6.3 in the first edition explores the implications of the issue of the nature of spacetime for quantum physics in order to see whether it can provide some insight into the nature of quantum objects Two new sections have been included namely Sect 5.6 entitled *Relativization of Existence and Observers in General Relativity* and Sect 7.6 titled *Probing the Anisotropic Velocity of Light by a Terrestrial Experiment* **Self-Organisation Shapes Travel Behaviours and Social Exclusion in Deprived Urban Neighbourhoods of China** Joseph Cho-yam Lau, 2020-03-19 This book investigates the influence of self organisation processes on the commuting of the poor workers in urban China It suggests a new approach to investigate and measure individual access and it argues that dynamic interactions between individual action and social structure influence individual's access to transport which cannot be measured using other traditional accessibility approaches The overwhelming majority of models in transport research assume that socio economic factors and the built environment influence the accessibility of transport for individuals This book provides evidence that individual decision makings and actions are also vital factors to bring out changes in accessibility Further the study adopts a self organisation process and structuration

theory to illustrate that a significant proportion of travel problems of migrants are rooted in the interaction between actions and social structures Any change in migrants actions or social structures in the self organisation process would result in the production of complex and spontaneous travel behaviour The self organisation approach presented provides a new approach for urban transport planning in the future particularly on the investigation of the accessibility of disadvantaged social groups By using the social theories transport research can have an effect on commuting behaviour and to improve poor workers quality of life

Concept and Formalization of Constellatory Self-Unfolding Albrecht von Müller, Elias

Zafiris, 2018-05-29 This volume offers a fundamentally different way of conceptualizing time and reality Today we see time predominantly as the linear sequential order of events and reality accordingly as consisting of facts that can be ordered along sequential time But what if this conceptualization has us mistaking the exhausts for the real thing i e if we miss the best the actual taking place of reality as it occurs in a very differently structured primordial form of time the time space of the present In this new conceptual framework both the sequential aspect of time and the factual aspect of reality are emergent phenomena that come into being only after reality has actually taken place In the new view facts are just the traces that the actual taking place of reality leaves behind on the co emergent canvas of local spacetime Local spacetime itself emerges only as facts come into being and only facts can be adequately localized in it But how does reality then actually occur It is conceived as a constellatory self unfolding characterized by strong self referentiality and taking place in the primordial form of time the not yet sequentially structured time space of the present Time is seen here as an ontophanetic platform i e as the stage on which reality can first occur This view of time and thus also space seems to be very much in accordance with what we encounter in quantum physics before the so called collapse of the wave function In parallel classical and relativistic physics largely operate within the factual portrait of reality and the sequential aspect of time respectively Only singularities constitute an important exemption here the canvas of local spacetime that emerged together with factization melts down again In the novel framework quantum reduction and singularities can be seen and addressed as inverse transitions In quantum physical state reduction reality gains the chrono ontological format of facticity and the sequential aspect of time becomes applicable In singularities by contrast the inverse happens Reality loses its local spacetime formation and reverts back into its primordial pre local shape making in this way the use of causality relations Boolean logic and the dichotomization of subject and object obsolete For our understanding of the relation between quantum and relativistic physics this new view opens up fundamentally new perspectives Both are legitimate views of time and reality they just address very different chrono ontological portraits and thus should not lead us to erroneously subjugating one view under the other The task of the book is to provide a formal framework in which this radically different view of time and reality can be addressed properly The mathematical approach is based on the logical and topological features of the Borromean Rings It draws upon concepts and methods of algebraic and geometric topology especially the theory of sheaves and links group

theory logic and information theory in relation to the standard constructions employed in quantum mechanics and general relativity shedding new light on the pestilential problems of their compatibility The intended audience includes physicists mathematicians and philosophers with an interest in the conceptual and mathematical foundations of modern physics *The Global Nonlinear Stability Of Minkowski Space For Self-gravitating Massive Fields* Philippe G Lefloch,Yue Ma,2017-08-16

This book is devoted to the Einstein s field equations of general relativity for self gravitating massive scalar fields We formulate the initial value problem when the initial data set is a perturbation of an asymptotically flat spacelike hypersurface in Minkowski spacetime We then establish the existence of an Einstein development associated with this initial data set which is proven to be an asymptotically flat and future geodesically complete spacetime **World Congress of Medical**

Physics and Biomedical Engineering 2006 Sun I. Kim,Tae S. Suh,2007-05-07 These proceedings of the World Congress 2006 the fourteenth conference in this series offer a strong scientific program covering a wide range of issues and challenges which are currently present in Medical physics and Biomedical Engineering About 2 500 peer reviewed contributions are presented in a six volume book comprising 25 tracks joint conferences and symposia and including invited contributions from well known researchers in this field **Information, Natural Law, and the Self-Assembly of Rhythmic Movement**

Peter N. Kugler,Michael T. Turvey,2015-12-14 Originally published in 1987 the introduction states the authors have successfully accomplished their program to explain based on physical representations the observed relations among various parameters of wrist pendulum oscillations Thereby a set of new ideas and concepts including those developed recently by the scientific school to which the authors belong are introduced to biology These concepts are closely related to the experimental data This accomplishment makes the book especially attractive and demonstrates once more the productivity of applying physics to biology Clear language simple figures and physical examples illuminate rather complicated problems These attractive features should make the book intelligible to a variety of investigators in the field of motor control not only to the specialists with physical and mathematical education From the foreword Kugler and Turvey have written strategic physical biology and shown that after all dynamics including both kinetics and kinematics may support a unitary physical view of some of the profound operations of our brains This is a grand start on what I hope is a larger program of demystifying behaviour

The Ecological Self Freya Matthews,2006-05-23 This is the first book length treatment of the metaphysical foundations of ecological ethics The author seeks to provide a metaphysical illumination of the fundamental ecological intuitions that we are in some sense one with nature and that everything is connected with everything else Drawing on contemporary cosmology systems theory and the history of philosophy Freya Mathews elaborates a new metaphysics of interconnectedness She offers an inspiring vision of the spiritual implications of ecology which leads to a deepening of our conception of conservation

Space Time And Self Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In today's fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Space Time And Self PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning. By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Space Time And Self PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources

available. In conclusion, the availability of Space Time And Self free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole.
