Neo-Frontier Spaces in Science Fiction Television Sebastian J. Müller, 2023-04-17 The idea of the frontier once the geographical borderline moving further and further West across the North American continent has shaped American science fiction television since its beginnings TV series have long adapted the frontier myth to outer space and have explored American Wests of the future This book takes a deeper look at the futuristic frontiers within such series as Star Trek Firefly Terra Nova Defiance and The 100 revealing how they rethink colonialism the environment spaces of risk and utopian dystopian worlds Harnessing forms of speculation and the post apocalyptic imagination these series engage with matters of the present from the legacies of colonialism to climate change and the increasing integration of humans and technologies In doing so these series question in novel ways the very idea of borders and reshape cultural binaries such as Self Other wilderness civilization city nature human non human and utopia dystopia

The NASA Program in the 1990s and Beyond, 1988 **On Orbit and Beyond** Douglas A. Vakoch, 2012-12-20 As we stand poised on the verge of a new era of spaceflight we must rethink every element including the human dimension This book explores some of the contributions of psychology to yesterday s great space race today s orbiter and International Space Station missions and tomorrow s journeys beyond Earth s orbit Early missions into space were typically brief and crews were small often drawn from a single nation As

international cooperation in space exploration has increased over the decades the challenges of communicating across cultural boundaries and dealing with interpersonal conflicts have become all the more important requiring different coping skills and sensibilities than the right stuff expected of early astronauts As astronauts travel to asteroids or establish a permanent colony on the Moon with the eventual goal of reaching Mars the duration of expeditions will increase markedly as will the psychosocial stresses Away from their home planet for extended times future spacefarers will need to be increasingly self sufficient while simultaneously dealing with the complexities of heterogeneous multicultural crews

On Orbit and Beyond Psychological Perspectives on Human Spaceflight the second considerably expanded edition of **Psychology of Space Exploration Contemporary Research in Historical Perspective** provides an analysis of these and other challenges facing future space explorers while at the same time presenting new empirical research on topics ranging from simulation studies of commercial spaceflights to the psychological benefits of viewing Earth from space This second edition includes an all new section exploring the challenges astronauts will encounter as they travel to asteroids Mars Saturn and the stars requiring an unprecedented level of autonomy Updated essays discuss the increasingly important role of China in human spaceflight In addition to examining contemporary psychological research several of the essays also explicitly address the history of the psychology of space exploration Leading contributors to the field place the latest theories and empirical findings in historical context by exploring changes in space missions over the past half century as well as reviewing developments in the psychological sciences during the same period The essays are innovative in their approaches and conclusions providing novel insights for behavioral researchers and historians alike

Beyond the Final Frontier. Everything for the Theory of Everything Mihai Fătu Efori, Cristina Fătu-Hartmann, We are intelligent beings This is why we are preoccupied with these questions Who are we Where are we coming from Where are we going But besides intelligence we are endowed with yet another quality of the mind and this is why we are troubled by even more enigmatic problems Does God exist Do we humans have a soul or are we just the superior product of evolution of matter simply emerged from the Big Bang This book is a provocation set aside your intelligence for a while at least for the duration of the journey we invite you on We will travel as far as possible and surprisingly we are not going to navigate with our intelligence but with the other quality of our mind It will guide us to the last frontier of matter to the last frontier of time and to the last frontier of knowledge We will set out on this trip armed on one hand with what scientists tell us they discovered digging deep inside our universe deep inside matter and deep inside time and on the other hand also with what religion reveals for us Who is telling the truth science or religion In the end we will be surprised to find out that atheists and believers contradict each other absolutely in vain In fact they all say the exact same thing Do you think this is a paradox You are right This is what your intelligence thinks But this paradox is an impediment only for your intelligence Our skillful guide will help us overcome this apparent set back Do you want to know how Open the book
