The Spanish Missionary Heritage of the United States United States. National Park Service, 1993 *Spain is Different?* Dale Knickerbocker, 2021-12-15 Employs a variety of theoretical approaches including critical and genre theories archetypal criticism and biblical studies Analyses an important literary trend apocalyptic fiction around the end of the second millennium Contextualises and explains the Spanish novels historically and compares and contrasts them with other global apocalyptic fictions Supports its observations with close reading of the texts [The Animals of Spain](#) Abel Alves, 2011-07-14 Writings from 1492 to 1826 reveal that the history of animals in the Spanish empire transcended the bullfight The early modern Spanish empire was shaped by its animal actors and authors from Cervantes to the local officials who wrote the relaciones geográficas were aware of this Nonhuman animals provided food clothing labor entertainment and companionship Functioning as allegories of human behavior nonhuman animals were perceived by Spanish and Amerindian authors alike as bearing some relationship to humans On occasion they even were appreciated as unique and fascinating beings Through empirical observation and metaphor some in the Spanish empire saw themselves as related in some way to other animals recognizing before Darwin a difference in degree rather than kind **The Other's War** Tarik Kochi, 2009-05-07 The Other's War is an intervention into a set of contemporary moral political and legal debates over the legitimacy of war and terrorism within the context of the so called global War on Terror Tarik Kochi considers how despite the variety of its approaches just war theory classical realist post Kantian poststructuralist contemporary ethical political and legal philosophy still struggles to produce a convincing account of war Focusing on the philosophical problem of the rightness of war The Other's War responds to this lack Through a discussion of a number of key Western intellectual traditions Kochi demonstrates how often conflicting and contradictory conceptions of war's rightness have developed in modernity He shows how a process of ordering violence around different notions of right has constantly redrawn the boundaries of what constitutes legitimate violence Such a process has consequences for anyone who claims to be fighting a just war Building upon this account and drawing upon the philosophical heritage of G W F Hegel and Ernst Bloch The Other's War proposes a new understanding of war not just as a social condition characterised by violent conflict and struggles for power but as the attempt of individuals and groups to realise their normative claims through violence Kochi argues that both of these aspects of war are an expression of the metaphysics of human subjectivity War begins with and is the radical exaggeration of a fundamental activity of human subjectivity in which the subject constitutes its normative and material identity realising and positing itself through acts that involve negation and violence By drawing consideration of the problem of war back to the level of a philosophical examination of the metaphysics of human subjectivity The Other's War develops a novel theory of war that helps us to better understand the nature of contemporary conflict as a process of recognition From this perspective judgment it is concluded needs to be constantly guided by the effort to recognise the ethics of the other's war *Foreign Policy*

Motivation Richard W. Cottam, 1977-01-15 Foreign policy motivation is a complex mix reflecting the fears and aspirations of public interest groups, bureaucratic sets and important individuals. International conflict cannot be resolved without resolving how foreign policy is motivated. This book presents a conceptual framework for identifying and weighing foreign policy motives that shape, direct and alter foreign policy. Contemporary U.S. Latinx Literature in Spanish Amrita Das, Kathryn Quinn-Sánchez, Michele Shaul, 2018-11-19 U.S. Latinx Literature in Spanish remains an understudied field despite its large and vibrant corpus. This is partly due to the erroneous impression that this literature is only written in English and partly due to traditional educational programs focusing on English texts to include non-Spanish speakers and non-Latinx students. This has created a vacuum in research about Latinx literary production in Spanish, leaving the contemporary field wide open for exploration. This volume fills this space by bringing contemporary U.S. Latinx literature in Spanish to the forefront of the field. The essays focus on literary production post 1960 and examine texts by authors from different backgrounds writing from the U.S., providing readers with an opportunity to explore new texts in Spanish within U.S. Latinx literature and a departure point for starting a meaningful critical discourse about what it means to write and publish in Spanish in the U.S. Through exploring literary production in a language that is both emotionally and politically charged for authors, the academia and the U.S., this book challenges and enhances our understanding of the term Americas. *Raising Heirs to the Throne in Nineteenth-Century Spain* Richard Meyer Forsting, 2018-05-31 This book analyses royal education in nineteenth-century constitutional Spain. Its main subjects are Isabel II (1830-1904), Alfonso XII (1857-1885) and Alfonso XIII (1886-1941) during their time as monarchs in waiting. Their upbringing was considered an opportunity to shape the future of Spain, reflected in the political struggles that emerged during the construction of a liberal state and allowed for the modernisation of the monarchy. The education of heirs to the throne was taken seriously by contemporaries and assumed wider political, social and cultural significance. This volume is structured around three powerful groups which showed an active interest, influenced and significantly shaped royal education: the court, the military and the public. It throws new light on the position of the Spanish monarchy in the constitutional state, its ability to adapt to social, political and cultural change and its varied sources of legitimacy, power and attraction. **Spanish Attitudes Toward Judaism** Adolfo Kuznitsky, 2014-09-04 Analyzing the history of the Jews of Spain from the time of the Visigoths to the present, this study investigates periods of discrimination against converted Jews that went beyond the merely religious, finding similarities to the racial and secular anti-Semitism of modernity. Some scholars have drawn parallels between the Spanish *castizo* ethnicism embodied in the cleanliness of blood statutes and the German *volkisch* anti-Semitic beliefs that sustained Nazism. Others have found Inquisition-like parallels in post-inquisitorial Spain, including during the Spanish Civil War and the Francoist era, as a result of the survival of ethno-religious prejudices in a country where there were no Jews. The singularities of Spanish anti-Semitism are revealed in the Spanish Paradox of anti-Semitism coexisting with philo-Sephardism and also in the Spanish sensitivity to

State Identities and the Homogenisation of Peoples Heather Rae, 2002-08-15 Why are forced displacement ethnic cleansing and genocide an enduring feature of state systems In this book Heather Rae locates these practices of pathological homogenisation in the processes of state building Political elites have repeatedly used cultural resources to redefine bounded political communities as exclusive moral communities from which outsiders must be expelled Showing that these practices predate the age of nationalism Rae examines cases from both pre nationalist and nationalist eras the expulsion of the Jews from fifteenth century Spain the persecution of the Huguenots under Louis XIV and in the twentieth century the Armenian genocide and ethnic cleansing in former Yugoslavia She argues that those atrocities prompted the development of international norms of legitimate state behaviour that increasingly define sovereignty as conditional Rae concludes by examining two threshold cases the Czech Republic and Macedonia to identify the factors that may inhibit pathological homogenization as a method of state building
