Catalogue of Research Literature for Development: Food production and nutrition, development and economics, education and human resources, health, selected development areas United States. Agency for International Development. Bureau for Technical Assistance, 1977 **Goat Meat Production and Quality** Osman Mahgoub, Isam T. Kadim, Edward Cottingham Webb, 2012 Written by some of the world's leading goat meat scientists and drawing from the most recent publications in the field this book comprehensively covers the most important areas of goat meat production Chapters discuss the role of genetics breeding reproduction and nutrition in producing good quality profitable goat meat The mineral amino acid and fatty acid composition of goat meat is also addressed along with a discussion of its nutritive value aimed at highlighting its health benefits over other red meats *Animal Sciences* John R. Campbell, M. Douglas Kenealy, Karen L. Campbell, 2009-12-24 This textbook is intended as a comprehensive introduction to the biology care and production of domestic animals and freshwater sh raised to provide food as well as pets kept for companionship and recreation The authors teaching and research experiences in agriculture animal and dairy sciences and veterinary medicine provide the professional expertise that underpins the clearly written discussions of advances in animal sciences affecting humans globally Coverage includes breeds and life cycles of livestock and poultry nutritional contributions of animal products to humans the principles of animal genetics anatomy and physiology including reproduction lactation and growth animal disease and public health and insects and their biological control Each chapter stands on its own Instructors

can assign higher priority to certain chapters and arrange topics for study in keeping with their preferred course outlines. The text has been classroom tested for four decades in more than 100 colleges and universities at home and abroad. Additionally, it is pedagogically enhanced with glossary terms in boldface type, study questions at the end of each chapter, more than 350 illustrations, and historical and philosophical quotations. These useful features aid students in comprehending scientific concepts as well as enjoying the pleasures derived from learning more about food-producing animals, horses, and popular pets.

A Companion to Spanish Environmental Cultural Studies Luis I. Pradanos, 2023. An exploration of how writers, artists, and filmmakers expose the costs and contest the assumptions of the Capitalocene era that guides readers through the rapidly developing field of Spanish environmental cultural studies. From the scars left by Franco's dams and mines to the toxic waste dumped in Equatorial Guinea, from the cruelty of the modern pork industry to the ravages of mass tourism in the Balearic Islands, this book delves into the power relations, material practices, and social imaginaries underpinning the global economic system to uncover its unaffordable human and non-human costs. Guiding the reader through the rapidly emerging field of Spanish environmental cultural studies with chapters on such topics as extractivism, animal studies, food studies, ecofeminism, decoloniality, critical race studies, tourism, and waste studies, an international team of US and European scholars show how Spanish writers, artists, and filmmakers have illuminated and contested the growth-oriented and neo-colonialist assumptions of the current Capitalocene era. Focussed on Spain, the volume also provides models for exploring the socioecological implications of cultural manifestations in other parts of the world.
