Sherna Berger Gluck, Daphne Patai

Sparrows Point Making Steel The Rise And Ruin Of American Industrial Might:

Making Steel Mark Reutter, 2004 *Making Steel* chronicles the rise and fall of American steel by focusing on the fateful decisions made at the world's once largest steel mill at Sparrows Point Maryland Mark Reutter examines the business production and daily lives of workers as corporate leaders became more interested in their own security and enrichment than in employees community or innovative technology This edition features 26 pages of photos an author's preface and a new chapter on the devastating effects of Bethlehem Steel's bankruptcy titled *The Discarded American Worker Sparrows Point* Mark Reutter, 1989 *Wives of Steel* Karen Olson, 2005 *Wives of Steel* is based on more than eighty formal interviews conducted over a fifteen year period with women and some men both white and black all of whom were part of Sparrows Point as workers spouses or longtime residents of the local communities Through the stories they tell we see how a male dominated industry has influenced personal family and social experiences over several generations We also see the distinct differences and surprising similarities among the lives of black and white women which often reflect the complicated relationships among black and white steelworkers in the plant *The United States and Latin America* Fredrick B. Pike, 2010-07-05 The lazy greaser asleep under a sombrero and the avaricious gringo with money stuffed pockets are only two of the negative stereotypes that North Americans and Latin Americans have cherished during several centuries of mutual misunderstanding This unique study probes the origins of these stereotypes and myths and explores how they have shaped North American impressions of Latin America from the time of the Pilgrims up to the end of the twentieth century Fredrick Pike's central thesis is that North Americans have identified themselves with civilization in all its manifestations while viewing Latin Americans as hopelessly trapped in primitivism the victims of nature rather than its masters He shows how this civilization nature duality arose from the first European settlers perception that nature and everything identified with it including American Indians African slaves all women and all children was something to be conquered and dominated This myth eventually came to color the North American establishment view of both immigrants to the United States and all our neighbors to the south *Changing Representations of Nature and the City* Gabriel N. Gee, Alison Vogelaar, 2018-07-04 The turn of the 1960s 70s characterized by the rapid acceleration of globalization prompted a radical transformation in the perception of urban and natural environments The urban revolution and related prospect of the total urbanisation of the planet in concert with rapid population growth and resource exploitation instigated a surge in environmental awareness and activism One implication of this moment is a growing recognition of the integration and interconnection of natural and urban entities The present collection is an interdisciplinary inquiry into the changing modes of representation of nature in the city beginning from the turn of the 1960s 70s Bringing together a number of different disciplinary approaches including architectural studies and aesthetics heritage studies and economics environmental science and communication the collection reflects upon the changing perception of socio natures in the context of increasing urban expansion and global

interconnectedness as they are were manifest in specific representations Using cases studies from around the globe the collection offers a historical and theoretical understanding of a paradigmatic shift whose material and symbolic legacies are still accompanying us in the early 21st century

The Way of the Ship Alex Roland, W. Jeffrey Bolster, Alexander Keyssar, 2008 The Way of the Ship offers a global perspective and considers both oceanic shipping and domestic shipping along America's coasts and inland waterways with explanations of the forces that influenced the way of the ship The result is an eye opening authoritative look at American maritime history and the ways it helped shape the nation's history

Blood On Steel Michael

Dennis,2021-04-27 This historical analysis of the 1937 Chicago Steel Strike demonstrates how it revealed systemic oppression and inspired the larger progressive movement On Memorial Day 1937 thousands of steelworkers and labor rights supporters gathered on the Southeast Side of Chicago to protest Republic Steel By the end of the day ten marchers had been mortally wounded and more than one hundred badly injured victims of a terrifying police riot that came to be known as the Memorial Day Massacre In Blood on Steel historian Michael Dennis identifies this tragic landmark in the fight for labor rights as a focal point in the larger movement for American equality during the New Deal Dennis shows how the riot captured on film by Paramount newsreels validated the claims of labor activists and catalyzed public opinion in their favor Senate hearings about the massacre revealed patterns of anti union aggression among management ranging from blacklists to harassment and vigilante violence The following year Congress would pass the Fair Labor Standards Act Dennis s wide angle perspective reveals the Memorial Day Massacre as more than another bloody incident in the long story of American labor management tensions It was an all too graphic illustration of the need for a broad based social democracy movement
