Sparse Matrix Computations:

Sparse Matrix Computations James Raymond Bunch, Donald J. Rose, 1976 *Sparskit* National Aeronautics and Space Administration (NASA), 2018-07-11 Presented here are the main features of a tool package for manipulating and working with sparse matrices One of the goals of the package is to provide basic tools to facilitate the exchange of software and data between researchers in sparse matrix computations The starting point is the Harwell Boeing collection of matrices for which the authors provide a number of tools Among other things the package provides programs for converting data structures printing simple statistics on a matrix plotting a matrix profile and performing linear algebra operations with sparse matrices Saad Youcef Unspecified Center DE FG02 85ER 25001 NCC2 387

Sparse Matrix Computations James R. Bunch, Donald J. Rose, 1976 The papers in this volume were presented at the Symposium on Sparse Matrix Computations held at Argonne National Laboratory in September 1975 It presents research in applied numerical analysis but with considerable influence from computer science Most of the papers deal explicitly or implicitly with the design analysis implementation and application of computer algorithms Such an emphasis includes not only the establishment of space and time complexity bounds as well as an attempt to understand the algorithms and the computing environment in enough detail to make design decisions for effective mathematical software to be used as tools in science and engineering

Sparse Matrix Computations : Proceedings James R. Bunch, Donald J. Rose, 1976 **Matrix Computations** Gene H. Golub, Charles F. Van Loan, 1996-10-15 Revised and updated the third edition of Golub and Van Loan's classic text in computer science provides essential information about the mathematical background and algorithmic skills required for the production of numerical software This new edition includes thoroughly revised chapters on matrix multiplication problems and parallel matrix computations expanded treatment of CS decomposition an updated overview of floating point arithmetic a more accurate rendition of the modified Gram Schmidt process and new material devoted to GMRES QMR and other methods designed to handle the sparse unsymmetric linear system problem

Efficient and Parallel Sparse Matrix Computations on the Web Prabhjot Sandhu, 2022 Large and sparse matrices occur in various scientific and compute intensive applications including popular targets such as big data analytics and machine learning applications The sparse matrix computations involved in these applications are considered critical for the overall performance due to their recurring nature At the same time we are witnessing a surge of such applications on the web due to the ease of accessibility and potential for interactive collaborative features In this context the heavy computation requirements of sparse computations pose a challenge Recent advancements in JavaScript and WebAssembly engines for web browsers however provide opportunities to enable better performance In this work we present SciWasm Sparse a web based computing framework that offers efficient and scalable sparse matrix CPU kernels to support high performance computing in web browsers It provides hand tuned implementations of Sparse BLAS Basic Linear Algebra Subroutines Level 2 operations element wise sparse
