Teaching and Learning Mathematics Linda Jensen Sheffield, Douglas E. Cruikshank, 2004-03-29 Help students make sense of mathematics Rather than merely discussing how to improve students ability to do mathematics this fifth edition focuses on helping them make sense of mathematics Based on research on the functioning of the mind as it engages in learning the text supports teachers as they promote mathematical understanding strengthen students abilities to think and help students to attain computational fluency Features A rich collection of ready to use learning activities Fully integrated language and intent of Principles and Standards for School Mathematics PSSM A greater emphasis on problem solving and higher level thinking A greater focus on teaching mathematics to diverse learners Descriptions of a variety of promising and effective mathematics programs for the K 8 levels Helping Children Learn Mathematics National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Mathematics Learning Study Committee, 2002-07-31 Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough Many students cannot correctly apply computational algorithms to solve problems Their understanding and use of decimals and fractions are especially weak Indeed helping all children succeed in mathematics is an imperative national goal However for our youth to succeed we need to change how we re teaching this discipline Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre kindergarten through eighth grade The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction instructional materials assessments teacher education and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction The book concludes by providing recommended actions for parents and caregivers teachers administrators and policy makers stressing the importance that everyone work together to ensure a mathematically literate society Learning and Teaching Early Math Douglas H. Clements, Julie Sarama, 2014-05-23 In this important book for pre and in service teachers early math experts Douglas Clements and Julie Sarama show how learning trajectories help diagnose a child's level of mathematical understanding and provide guidance for teaching By focusing on the inherent delight and curiosity behind young children's mathematical reasoning learning trajectories ultimately make teaching more joyous They help teachers understand the varying levels of knowledge exhibited by individual students which in turn allows them to better meet the learning needs of all children Using straightforward no nonsense language this book summarizes the current research about how children learn mathematics and how to build on what children already know to realize more effective teaching This second edition of Learning and Teaching Early Math remains the definitive research based resource to help teachers understand the learning trajectories of early mathematics and become quintessential professionals Updates to the new edition include Explicit connections between Learning Trajectories and the new Common Core State Standards New

coverage of patterns and patterning Incorporation of hundreds of recent research studies STEM Education: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2014-12-31 This reference brings together an impressive array of research on the development of Science Technology Engineering and Mathematics How Children Learn Math Nancy Krasa, Karen curricula at all educational levels Provided by publisher Tzanetopoulos, Colleen Maas, 2022-10-25 Written for pre service and in service educators as well as parents of children in preschool through grade five this book connects research in cognitive development and math education to offer an accessibly written and practical introduction to the science of elementary math learning Structured according to children s mathematical development How Children Learn Math systematically reviews and synthesizes the latest developmental research on mathematical cognition into accessible sections that explain both the scientific evidence available and its practical classroom application Written by an author team with decades of collective experience in cognitive learning research clinical learning evaluations and classroom experience working with both teachers and children this amply illustrated text offers a powerful resource for understanding children's mathematical development from quantitative intuition to word problems and helps readers understand and identify math learning difficulties that may emerge in later grades Aimed at pre service and in service teachers and educators with little background in cognitive development the book distills important findings in cognitive development into clear accessible language and practical suggestions. The book therefore serves as an ideal text for pre service early childhood elementary and special education teachers as well as early career researchers or as a professional development resource for in service teachers supervisors and administrators school psychologists homeschool parents and other educators

Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences Philip Hui Li, Anne Forbes, Weipeng Yang, 2023-12-11 This book informs best practice for enhancing young children's STEM learning experiences in formal settings such as preschool environments and less formal settings such as home environments It is the first collection of multidisciplinary and multinational studies on early STEM programs worldwide and presents diverse authentic and current STEM relevant scenarios that address two fundamental problems where are we in early STEM education and where shall we go The book explores factors that influence young learners abilities to make informed choices in authentic problem based STEM relevant scenarios and how those abilities have been identified documented and enhanced Chapters address topics related to curriculum and pedagogy teacher education and professional development family environment and inclusive education from a variety of international settings including Australia Germany Hong Kong Mainland China Singapore and the United States Each chapter is based around a research project and describes relevant background information from the research literature details of how the study was designed findings from the study and discussion as to what the findings mean for practical implementation Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences will be a key resource for researchers and

Cognitive Abilities and Educational Outcomes Monica Rosén, Kajsa Yang Hansen, Ulrika Wolff, 2016-10-03 This book addresses problems and challenges that face educational measurement at a time when multipurpose usage of observational data from educational assessments tests and international surveys has become a growing global trend While the construction of educational measures and use of educational data offer many opportunities they also require awareness of the numerous threats to validity and methods of reducing such threats Written by leading international scholars the book demonstrates the complexity of educational measurement by addressing three broad and interrelated topics. The first part discusses cognitive abilities including studies on fluid intelligence its improvement and its links to aptitude tests for admission to higher education The second part focuses on the effects of school and teacher related factors on school outcomes at individual and group levels and uses international studies to analyze causes The third part presents analytical techniques and measurement methods to improve reliability for example factor analysis using Bayesian estimators bi factor analysis model misfit and solutions and discusses balance issues in reporting test results The book provides examples of state of the art analytical techniques for pursuing fundamental research problems and the latest advances in measurement methods with a focus on validity improvement Eminent researchers discuss and provide insights into questions such as Is it possible to train individuals to think at a higher level than normal for their age What determines prospective preschool teachers skill to perceive mathematics related preschool situations Can international indicator design and instruments be improved to use trends and national context variables more efficiently Can indicator data at national school and class levels be compared easier Are value added measures of teacher effectiveness valid when it comes to hiring and promoting teachers Is money better spent on teacher training than on smaller class size How do theory and empirical statistical data intertwine in building structures of understanding This book is inspired by the career and personal influence of the Swedish scholar Professor Jan Eric Gustafsson renowned for his research on individual differences especially the structure of cognitive abilities and on the effects of education on knowledge and skills **Resources in Education** ,2001-04 Learn Science. Learn Math. Learn to Teach Science and Math, Homo Sapiens HEDY MOSCOVICI, Penny J. Gilmer, Katherine C.
