The Psychology of Educational Technology and Instructional Media Ken Spencer, 2017-09-11 What can research in cognitive psychology offer the growth of educational technology and instructional media Originally published in 1988 this book argues that for much of its history educational technology has been concerned with justifying and verifying the basic assumption that the processes and products of technology can improve instructional effectiveness The result is seen as a systems approach grounded in empiricism and the failure to incorporate much important research in cognitive psychology The book argues that it is now time for educational technology to come to terms with new ideas in cognitive and particularly constructivist psychology and it both advocates and describes the forging of new links between the two disciplines

Media Education in Asia Chi-Kim Cheung, 2009-06-12 Media education in Asia is a relatively young but rapidly developing part of the curriculum Research has

been conducted and papers have been written on various issues concerning media education in Asia. The dominant models of media education in the world are broadly Western and most are drawn from English speaking countries. The question is whether a similar pattern exists in Asia where there may be differences in culture, heritage, beliefs, values, education policy as well as curriculum and pedagogy. Are educators in Asia following the Western model in developing and implementing media education or are they devising their own models? With this question in mind, this book sets out to understand the prevailing perspectives regarding media education in various Asian societies. While most debates about media education are carried out in Western contexts, this book hopes to provide a platform for readers to examine this issue in an Asian context.
