The Teaching of philosophy , 1953 Globalized Knowledge Flows and Chinese Social Theory Xiaoying Qi, 2014-01-21 This book considers the nature and possibilities of conceptual change and transformation under conditions of globalization especially with regard to Chinese social and cultural concepts It argues that the influence of globalization promotes the spread of West European and American social science concepts and methods at the expense of local concepts and approaches and at the same time paradoxically provides opportunities for the incorporation of local concepts including Chinese concepts into Western or mainstream social science **LGBTQI Inclusivity, Homosexuality, and Same-Sex Marriage in the Catholic Church** Vivencio O Ballano, 2024-08-19 This book employs an experimental approach to critically re examine the Catholic Church s traditional teachings on homosexuality heterosexual marriage and Lesbian Gay Bisexual Transgender Queer and Intersexual LGBTQI inclusivity in light of Pope Francis s inductive synodal theology and modern sociology With the growing complexity of today s culture and the advancement of social science research it argues that the empirical foundations of the traditional Church s doctrines on topical moral issues need to be scientifically re assessed so as to update them in view of Francis s synodality and sociological research on gender sexuality and same sex union Discussion pertaining to whether homosexuality is naturally disordered and whether heterosexuality is the only criterion for Christian marriage remain lingering empirical issues in the Church that require a sociological and inductive synodal analysis rather than the traditional deductive philosophical and theological method that is largely based on natural law theory This topical book is of appeal to scholars and students of sociology theology as well as religious biblical and gender studies

Contemporary Natural Philosophy and Philosophies - Part 2 Marcin J. Schroeder, Gordana Dodig-Crnkovic, 2020-11-19

Modern technology has eliminated barriers posed by geographic distances between people around the globe making the world more interdependent. However, in spite of global collaboration within research domains, fragmentation among research fields persists and even escalates. Disintegrated knowledge has become subservient to the competition in the technological and economic race leading in the direction chosen not by reason and intellect but rather by the preferences of politics and markets. To restore the authority of knowledge in guiding humanity, we have to reconnect its scattered isolated parts and offer an evolving and diverse but shared vision of objective reality connecting the sciences and other knowledge domains and informed by and in communication with ethical and esthetic thinking and being. This collection of articles responds to the second call from the journal *Philosophies* to build a new networked world of knowledge with domain specialists from different disciplines interacting and connecting with the rest of the knowledge producing and knowledge consuming communities in an inclusive extended natural philosophic human centric manner. In this process of reconnection, scientific and philosophical investigations enrich each other with sciences informing philosophies about the best current knowledge of the world, both natural and human made, while philosophies scrutinize the ontological, epistemological and methodological foundations of sciences.

The Pianist's Bookshelf, Second Edition Maurice Hinson, Wesley Roberts, 2023-11-07

Originally published in 1997, *The Pianist's Bookshelf* was, according to the *Library Journal*, a unique and valuable tool. Now rewritten for a modern audience, this second edition expands into the 21st century. A completely revised update, *The Pianist's Bookshelf Second Edition* comes to the rescue of pianists overwhelmed by the abundance of books, videos and other works about the piano. In this clear, easy-to-use reference book, Maurice Hinson and Wesley Roberts survey hundreds of sources and provide concise practical annotations for each item, thus saving the reader hours of precious research time. In addition to the main listings of entries such as Chamber Music and Piano Duet, the book has indexes of authors, composers and performers. A handy reference from the masters of piano bibliography, *The Pianist's Bookshelf Second Edition* will be an invaluable resource to students, teachers and musicians.

An Introduction to Robophilosophy: Cognition, Intelligence, Autonomy, Consciousness, Conscience, and Ethics Spyros G. Tzafestas, 2022-09-01

Modern robots have arrived at a very matured state both in their mechanical control aspects and their mental aspects. *An Introduction to Robophilosophy* explores the philosophical questions that arise in the development, creation and use of mental, anthropomorphic and zoomorphic robots that are capable of semiautonomous, autonomous operation, decision making and human-like action, being able to socially interact with humans and exhibit behavior similar to human beings or animals. Coverage first presents fundamental concepts and an overview of philosophy, philosophy of science and philosophy of technology. The six principal mental capabilities of modern robots, namely cognition, intelligence, autonomy, consciousness, conscience and ethics, are then studied from a philosophical point of view. They actually represent the product of technological embodiment of cognitive features to robots.

Overall readers are provided a consolidated thorough investigation of the philosophical aspects of these mental capabilities when embedded to robots This book will serve as an ideal educational source in engineering and robotics courses as well as an introductory reference for researchers in the field of robotics and it includes a rich bibliography
