Teaching Democracy By Being Democratic:

Teaching Democracy by Being Democratic Ted Becker, Richard A. Couto, 1996-10-30 The best way to teach democracy has been the subject of an ongoing debate for 2 500 years Unlike most books about teaching democracy this one spends more time on how to teach democracy than the what and why of teaching democracy It punctures the irony of teaching democracy by lectures and superior teachers In its place this book provides a variety of illustrations for the teaching of democracy in an experiential and egalitarian fashion The introduction presents a theoretical and analytical framework of democracy and democratic pedagogy The six chapters cover topics such as structuring a democratic classroom democratic practices that empower students problem solving and community service that make the classroom a laboratory for democracy and university based programs of democratic alternatives that serve the community The volume s treatment of community organization students as collaborators personal empowerment the community of need and response and the democratic organization expresses its preference for direct democratic participation *Teaching Democracy* Walter C. Parker, 2003 In *Teaching Democracy* Walter Parker makes a unique and thoughtful contribution to the hot debate between proponents of multicultural education and those who favor a cultural literacy approach Parker conclusively demonstrates that educating for democratic citizenship in a multicultural society includes a fundamental respect for diversity This scholarly yet accessible work Bridges the widening gap between multicultural education and civic education Provides powerful teaching strategies that educators can use to draw children creatively and productively into a way of life that protects and nurtures cultural pluralism and racial equity Explains the unity diversity confusion that is found in popular media as well as in multicultural and citizenship education initiatives Defines deliberative discussion and explores its promise as the centerpiece of democratic education in schools both elementary and secondary At a moment in time when our connection to the nation seems superficial and jingoistic Walter Parker offers us a vehicle to reach our ideal of deliberative committed civic participation for every citizen This book explores the hard work of citizen making in a diverse and complex society where individual and group interests often are in conflict Parker makes us realize that in a democracy public is not a dirty word and schooling should not be punishment Gloria Ladson Billings University of Wisconsin Madison This book deals in an engaging and thought provoking way with both social realities and democratic possibilities exactly what I try to do in my classroom Wendy Ewbank teacher Seattle Girls School *The Ghosts in Our Classrooms, or: John Dewey Meets Ceausescu* Annette Freyberg-Inan, Radu Cristescu, 2006-01-16 How can democracy be learned And how successful are we at teaching and learning it This book does three things First it explains why civic education is important for the growth and survival of any type of democracy Second it focuses on a particular country which is in many ways representative for the general problems of post communist transition to democracy It carefully examines the practical reality of civic education in Romania both at the level of general schooling and in higher education Emphasis lies on the ways in which the ideals of civic education clash

with post communist realities and on the obstacles that continue to exist in this transition country to the democratic empowerment of citizens through education Scarcity of resources corruption in many forms and attitudes of deference to authority among other problems perpetuate a situation in which education fails to support democratization and instead reflects the failures of regimes of the past Third the book offers concrete recommendations for how civic education in Romania and elsewhere can be improved How can education be organized to successfully support the realization of democratic ideals This book is based on its main author's direct experience working in the field of civic education in Romania between 1999 and 2005 and draws on her wider expertise in the study of Romanian political economy and the country's European integration as well as in the fields of political psychology and democratic theory It is of particular interest for teachers and social scientists willing to reflect on the implications of their teaching or research for democratic empowerment for policymakers and activists who seek to support processes of democratization as well as for students of post communist transition countries in general and of Romania in particular It provides an accessible informative and frequently humorous account of lofty ideals clashing with harsh realities on the battlefield of democratic emancipation *Civic Engagement in Higher Education* Barbara Jacoby and Associates, 2009-01-27 Numerous studies have chronicled students' lack of trust in large social institutions declining interest in politics and decreasing civic skills This book is a comprehensive guide to developing high quality civic engagement experiences for college students The book defines civic engagement and explains why it is central to a college education It describes the state of the art of education for civic engagement and provides guidelines for designing programs that encourage desired learning outcomes In addition the book guides leaders in organizing their institutions to create a campus wide culture of civic engagement *Resources in Education*, 1998

Experiencing Citizenship Richard M. Battistoni, William E. Hudson, 2023-07-03 This practical guide is intended for faculty and service learning directors combining the how to information and rigorous intellectual framework that teachers seek What distinguishes this volume is that the contributors are writing for their peers They discuss how service learning can be implemented within political science and what this discipline contributes to the pedagogy of service learning The book offers both theoretical background and practical pedagogical chapters which describe the design implementation and outcomes of political science service learning programs as well as annotated bibliographies program descriptions and course syllabi **Transformational Politics** Stephen Woolpert, Christa Daryl Slaton, Edward W.
