The Predatory Paradox Amy Koerber, Jesse C. Starkey, Karin Ardon-Dryer, R. Glenn Cummins, Lyombe Eko, Kerk F. Kee, 2023-10-24 In today's publish or perish academic setting the institutional prizing of quantity over quality has given rise to and perpetuated the dilemma of predatory publishing. Upon a close examination however the definition of predatory itself becomes slippery evading neat boxes or lists which might seek to easily define and guard against it. This volume serves to foreground a nuanced representation of this multifaceted issue. In such a rapidly evolving landscape this book becomes a field guide to its historical political and economic aspects presenting thoughtful interviews, legal analysis and original research. Case studies from both European American and non European American stakeholders emphasize the worldwide nature of the challenge faced by researchers of all levels. This coauthored book is structured into both textual and supplemental materials. Key takeaways, discussion questions and complete classroom activities accompanying each chapter provide opportunities for engagement and real world applications of these concepts. Crucially relevant to early career researchers and the senior faculty library scholars and administrators who mentor and support them. *The Predatory Paradox: Ethics, Politics and Practices in Contemporary Scholarly Publishing* offers practical recommendations for navigating the complex and often contradictory advice currently available. University instructors and teaching faculty will also find the reading essential in order to properly prepare both graduate and undergraduate students for the potential pitfalls endemic to scholarly publishing.

Facility Management Practices Solomon Pelumi Akinbogun, Clinton Ohi, Aigbavboa, Oluwaseun Tope Akinbogun, 2024-10-30 This book explores the management of public facilities and the wider issues around it with examples from educational health facilities and public spaces. Human activities in every economy require facilities that must be effectively managed for optimal performance. Facility management in the public and private sector in developing countries requires close examination to explain the reasons for things going wrong. From the economist's point of view some facilities are better provided by public sector to maintain inclusivity and protect the social welfare of vulnerable people. For example in Nigeria a good number of public facilities such as schools and health facilities are under performing because of poor and ineffective management. This provides an opportunity for the private sector. However a majority of the population remains deprived of access because of lack of affordability. The research in this book was carried out to assess what could be done to ensure that essential services are not left entirely in the private sector and

scope out possible synergies between the public and private The book is useful to policy makers at all levels of the public and private sectors
