language English abstract Education is probably the most important aspect in our times Without education a state would have no medical service no computer specialists no politics and democracy no business no economy short a state would not work at all Education is the key for individual chances and success in life and the driving force for developments in society Prosperity derives from education Culture is a result of education just as interest in politics and most important perspectives for later occupations Politics concerning education cannot work where not enough attention is paid to achievements in school where it seems to be not important what students learn in contrast to students in other states The recent PISA study showed unfortunately how little attention was paid to education in Germany in the last decades It is not possible to find a

convincing answer to where the problem was may it be the German school system the instruction of new teachers at universities teachers who are no longer motivated after having reached the state of an official parents who do not seem to care about their children's abilities in reading and writing In fact a change in our school system is Germany's deepest need at the moment to improve pupils' achievements Therefore alternative methods will probably gain more and more interest in our school and teaching system I will try to introduce describe and discuss some of these methods I will show up their difficulties risks and also possible chances In the end I will try to decide if those approaches will find their ways sooner or later or if they will remain utopian

Effective Foreign Language Teaching at the Primary Level Manuel Jiménez Raya, 2001 This book focuses on the most recent methodological developments and views in the field of foreign language teaching, with issues concerning mainly the foreign language teacher. Its aim is to lead teachers to a better understanding of their own assets, beliefs, and values and to help them to improve their competencies. It deals with both the methodological and language preparation of teachers in order to give them a deeper understanding of the process of teaching and learning languages at the primary level. The first part of the book presents several papers about different methodological issues linking theory and practice. The education of the teacher from a linguistic and a methodological point of view is the main focus. The next section of the book deals with research in language teaching, teacher education, and language. Finally, the last section brings together four papers dealing with classroom teaching and the role of observation in teacher education. It is of interest to teachers, teacher trainers, and student teachers as it analyses important questions such as the nature of language teaching, the specific skills needed, the creation of an appropriate environment for teaching, and the use of materials and resources.
