**International Handbook of Information Technology in Primary and Secondary Education** Joke Voogt,Gerald Knezek,2008-08-26 Since the introduction of the computer into education in the 1960 s its potential for K 12 education has been widely recognized The terminology used at times confusing due to rapid technology change has continuously evolved We are in transition to an information society and the term computer technology has been replaced by information technology IT or information and communication technology ICT New demands from the information society require education to focus on information management and communication skills for which IT can be an essential resource IT offers promising environments and tools to support new approaches to teaching and learning Despite major investments the implementation of IT in education has been a persistent problem And although it is generally assumed that IT has high potential for improving education major research findings have only recently confirmed positive results of IT on students performance While there is a vast amount of research on information technology IT in K 12 education most of it is scattered

Until now a unified presentation of the research from a broad international perspective has not been accomplished. As a ground breaking publication the two volume International Handbook on Information Technology fully synthesizes the major issues and directions of research in the field. One major focus of the Handbook is the design and potential of IT based student learning environments. Offering the latest research in IT and the learning process distance learning and emerging technologies for education these chapters address the critical issue of the potential for IT to improve K 12 education. A second important theme deals with the implementation of IT in educational practice. In these chapters barriers and opportunities for IT implementation are studied from several perspectives: the teacher, the curriculum, the school organization and educational policy. Curriculum, competencies and attitudes, teacher learning, schools and international and regional programs and policies are examined to improve understanding how the implementation of IT in K 12 educational practice can be supported. Additional topics addressed in the Handbook include the role of education in the information society, threats to equity in education and as well various approaches to research in IT in education. The International Handbook on Information Technology in Primary and Secondary Education provides researchers, policy makers and practitioners with an integrated and detailed overview of this complex field making it an essential reference for all libraries and educators.

Reading Families Catherine Compton-Lilly, 2003. This dynamic text offers a rare glimpse into the literacy development of urban children and their families' role in it. Based on the author's candid interviews with her first grade students, their parents and grandparents, this book challenges the stereotypical view that urban parents don't care about their children's education. By listening closely to the voices of her students and their families, the author helps us to move beyond negative assumptions, revealing complexities that have previously been undocumented.

Teacher Narrative as Critical Inquiry Joy S. Ritchie, David E. Wilson, 2000. Research on teacher learning has too often excluded personal development in considering professional development. This timely book argues that the development of a professional identity is inextricable from personal identity. It suggests that when teachers are given the opportunity to compose their own stories of learning within a supportive community, they can then begin to compose new narratives of identity and practice. This book is a critical tool for educators seeking to refine their teaching practice and author their own development.

From Another Angle Margaret Himley, Patricia F. Carini, 2000-03. This volume represents the first effort to present and teach the descriptive processes, philosophy and values developed at the Prospect Archives and Center for Education and Research in North Bennington, Vermont. Through story and essay, it introduces a disciplined collaborative method for understanding children as thinkers and learners, called the descriptive review of the child. Developed through the Prospect Center under the leadership of Patricia F. Carini, the descriptive review is a mode of inquiry that draws on the rich, detailed knowledge teachers and parents have of children and on their ability to describe those children in full and balanced ways so that they become visible as complex persons with particular strengths, interests and capacities. In an educational climate that calls increasingly for standardization

Campano Delvin Dinkins Kelly A Harper Gillian Maimon Gary McPhail Swati Mehta Rob Simon and Diane Waff Cochran Smith and Lytle once again prove themselves to be among the best at melding theory and practice Instead of merely making the case for practitioner inquiry they go the next step to show us exactly what this genre brings to our field rigor relevance and passion The interplay of conceptual clarity and powerful exemplars make this a text we will read well into the next decade Gloria Ladson Billings University of Wisconsin Madison Once again Marilyn Cochran Smith and Susan Lytle point the way to new and hopeful understandings of practitioner research Rather than blame teachers for all that is wrong with education they and their fellow authors remind us that if school reform is to have any chance of fulfilling its stated goal of equal opportunity for all students teachers must have a significant voice in research policy and practice With its focus on social justice and its view of practitioner research as transformative this is a powerful and welcome sequel to their classic Inside Outside Sonia Nieto Professor Emerita University of Massachusetts Amherst Inquiry as Stance should be a blockbuster This brilliant sequel re calibrates relationships between practitioner inquiry and social justice Carole Edelsky Professor Emerita Arizona State University This optimistic and generous book is sure to become a central reference for teacher researchers in K 16 schools and their colleagues and supporters throughout the system Elyse Eidman Aadaahl Director National Programs and Site Development National Writing Project University of California Berkeley This view of the intellectual and personal work of teaching is a major counter to the contemporary emphasis on testing and packaged curricula Cynthia Ballenger reading specialist Cambridge Public Schools Once again Cochran Smith Lytle and their colleagues bring us an invaluable book on the enormous possibilities of practitioner research Luis C Moll College of Education University of Arizona
