## Teaching School Subjects:

**Teaching the Elementary School Subjects: Content and Strategies in Teaching the Basic Elementary School Subjects**, 1995      **Studying School Subjects** Ivor F. Goodson, Colin J. Marsh, 2005-08-04 School subjects and how they are viewed and positioned within education is the focus of this text. It argues that as part of rethinking the whole school curriculum there has been a failure to look at the historical and social background of school subjects.      *Teaching Elementary School Subjects* Kenneth Lawrence Husbands, 1961      **Subject Knowledge** Christopher J. Anstead, Ivor F. Goodson, J. Marshall Mangan, 2002-11 This text attempts to account for the growth of increased interest by sociologists and others in school subjects since the 1960s. Goodson's analysis of his own work examines the range of insights afforded of the nature of schooling and teaching through the study of school subjects.      *School Subjects and Curriculum Change* Ivor F. Goodson, 2013-04-03 The process of curriculum development is highly practical as Goodson shows in this enlarged anniversary third edition of his seminal work. The position of subjects and their development within the curriculum is illustrated by looking at how school subjects in particular geography and biology gained academic and intellectual respectability within the whole curriculum during the late 1960s and early 1970s. He highlights how subjects owe their formation and accreditation to competing status and their power to compete in the provision of worthwhile knowledge and considers subjects as continually changing sub groups of information. Such subjects from the framework of the society in which individuals live and over which they have influence. This volume questions the basis on which subject disciplines are developed and formulates new possibilities for curriculum development and reform in a post modernist age.      **Teaching Elementary School Subjects** Louis Win Rapeer, 1917      *School Subject Teaching* Ashley Kent, 2013-12-19 Covering each of the core curriculum areas in turn this is a reference on school subject teaching. The authors assess the development of teaching within each subject area since the 1944 Education Act up to the year 2000. Future challenges are also explored.      *Business, Economics and Enterprise* Peter Davies, Jacek Brant, 2006 This book is for newly qualified teachers and PGCE students of business education and economics. It covers the training standards for NQTS but goes beyond this with a focus on the subject expertise they bring into teaching.      **The Formation of School Subjects** Thomas S. Popkewitz, 2018-10-03 Originally published in 1987 This volume focuses upon the emergence of the subject matter of the American school. This provides entrance to looking at the interplay between social cultural economic and professional interests that give form to contemporary school practices. The historical detail enables understanding of how school knowledge is shaped and fashioned by issues of structural continuity and social transformation. This selection of chapters looks at how practices have been shaped by the struggles to define the American school curriculum in different subjects. The authors bring out how particular social values are made into ideologies and examine the past to enable consideration of the possibilities for further development.      *The Teaching of High School Subjects* William Alfred Millis, Mrs. Harriet Harding Millis, Mrs Harriet

Harding Millis,1925      **Developing a Didactic Framework Across and Beyond School Subjects** Søren Harnow Klausen,Nina Mård,2023-12-22 Centered around a contemporary conception of Bildung this book effectively demonstrates how the aims of cross and transcurricular teaching can be reconciled resulting in a didactic framework for teaching and learning in secondary schools that can be applied internationally Chapters present a nuanced and unified approach to fusing theory and practice by offering accounts of some of the most promising teaching methods from leading scholars in the field of curriculum research These methods include dialogic teaching or movement integration transversal competences like digital or entrepreneurial thinking and topics that call for crosscurricular approaches like sustainability or citizenship Addressing diverse worries and criticisms of crosscurricular teaching the book includes international viewpoints and trends such as sustainability citizenship and student motivation to present a comprehensive and systematic scholarly treatment of crosscurricular didactics within the classroom It further addresses important challenges that have been widely ignored like how to evaluate crosscurricular work Ultimately this volume makes a highly novel contribution to the field of crosscurricular didactics and will be of interest to researchers scholars and academics in the fields of secondary education teaching and learning educational science and curriculum design Those interested more broadly in the theory of education will also find the volume of use The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license      Remedial Techniques in Basic School Subjects Grace Maxwell Fernald,1943      **Teaching Methods in Science Subjects Promoting Sustainability** Eila Jeronen,2018-04-03 This book is a printed edition of the Special Issue Teaching Methods in Science Subjects Promoting Sustainability that was published in Education Sciences      *English* John Hardcastle,2004 The book covers the official training standards for NQTs and the Induction Standards in a way that will enable students to connect what is said with their obligations to demonstrate achievement against national performance criteria And yet the book will also openly challenge students to acknowledge the future of their specialist subject and of their professional identity and empower them with the expertise they bring to teaching As well as offering guidance for best practice this book will challenge students to think about the future of their subject and of themselves as a professional      *The Elementary School Subjects ...: How to teach the fundamental subjects* Calvin Noyes Kendall,George Alonzo Mirick,1915      **Science** Vanessa Kind,Keith Taber,2005 This is a text for new teachers of science in the years of their early professional development including those on PGCE courses those in their induction year and those in years two and three of their teaching career      **Vocational Education Bulletin** United States.
