Tymn, 1988 Solaris Mark Bould.2019-07-25 Despite being one of Andrei Tarkovsky s most successful films Solaris 1972 was the one he most disliked This dismissal of his most generically marked film has often been accepted by those quick to embrace the image of Tarkovsky as a transcendent artist rising above the politics of the Soviet film industry and the trappings of genre to produce personal works of art Going against such currents Mark Bould instead treats Solaris as the product of a genre as well as the work of a skilled film maker He teases out Tarkovsky's fascination with Stanislaw Lem on whose novel the film was based and also considers Steven Soderbergh's 2002 adaptation Lively and revealing Bould's examination situates Solaris within the Russian and global cultures of the fantastic to which Tarkovsky contributed three major science fiction films This special edition features original cover artwork by Matthew Shlian Brave new words Jeff Prucher, American Studies Jack Salzman, American Studies Association, 1986-08-29 A major three volume bibliography including an additional supplement of an annotated listing of American Studies monographs published between 1900 and 1988 Film Genre Reader III Barry Keith Grant, 2003-12-01 More than 30 essays by some of film's most distinguished critics are included in this volume which presents the latest developments in genre study including teen films genre hybridity neo noir genre in the age of globalization an up to date
