*Teaching Special Students in General Education Classrooms* Rena B. Lewis, Donald H. Doorlag, 2003 The Seventh Edition of *Teaching Special Students in General Education Classrooms* by Rena B. Lewis and Donald H. Doorlag is uncompromising in its dedication to preparing educators to teach effectively the range of students found in the typical elementary or secondary classroom. Using a case-based approach, the text provides information about four groups of students with special needs: students with disabilities, gifted and talented learners, culturally and linguistically diverse individuals, and students at risk for school failure. In addition, it demonstrates the vast resources we now have available through technology and presents practical strategies for adapting standard instruction to meet the learning needs of all students in general education classrooms based on the latest information on the IDEA Improvement Act. **Self-instruction Pedagogy** Dennis E. Mithaug, Deidre K. Mithaug, 2007 This book describes a method of teaching that fosters autonomous learning in all students including students with disabilities The pedagogy is based on decades of research on strategy instruction as well as on a theory of learning that claims these four conditions promote self-determined learning in all learners 1 opportunities to choose expectations for gaining something from a learning challenge 2 strategies that regulate responses to meet those expectations 3 comparisons between results and expectations that provoke additional adjustment in expectations and responses and 4 persistent engagement and adjustment until results match expectations The pedagogy of self-instruction described in this book anchors these conditions in everyday instruction so students can learn by adjusting to their own expectations Chapter 1 compares this approach to the teacher-directed methods of direct instruction that require teachers to set expectations for students control how students respond to them evaluate the outcomes they produce and then prescribe adjustments students must make to improve Chapter 2 provides evidence that too much of special education instruction reflects this teacher-directed approach and as a consequence discourages students from learning how to learn on their own Chapters 3-6 identify four ways to shift learning control from teachers to students and Chapters 7 and 8 identify the obstacles to achieving this instructional shift in special education The appendices of the book provide a bibliography of research on self-instruction and direct instruction pedagogies and a validated self-assessment that can evaluate the directedness of your teaching The Practical Guide to High-Leverage Practices in Special Education Ruby
