Teaching Young Children: Choices In Theory And Practice Mac Naughton, Glenda, Williams, Gillian, 2008-11-01 This book presents early childhood students and staff with a broad and diverse range of teaching techniques to support children's learning. It examines 26 techniques ranging from simple ones such as describing and listening to more complex methods such as deconstruction and scaffolding. The strategies selected are derived from the best current research knowledge about how young children learn. A detailed evaluation of each strategy enables childcare staff, early childhood teachers, and students to expand their repertoire of teaching strategies and to critically evaluate their own teaching in early childhood settings. Vignettes and examples show how early childhood staff use the techniques to support children's learning and help to bring the discussion of each technique to life. Revised and updated in light of the latest research, new features include Coverage of the phonics debate Addition of ICT content Questions for further discussion Revision to the chapter on problem solving Updated referencing throughout *Teaching Young Children* is key reading for students and experienced early childhood staff working in diverse settings with young children *Who Am I in the Lives of Children?* Stephanie Feeney, Doris Christensen, 1979 Handbook of Curriculum Theory, Research, and Practice Peter Pericles Trifonas, Susan Jagger, 2024-02-22 This Handbook paints a portrait of what the international field of curriculum entails in theory, research, and practice. It represents the field accurately and comprehensively by preserving the individual voices of curriculum theorist, researchers, and practitioners in relation to the ideas, rules, and principles that have evolved out of the history of curriculum as theory, research, and practice dealing with specific and general issues. Due to its approach to both specific and general curriculum issues, the chapters in this volume vary with respect to scope. Some engage the purposes and politics of schooling in general. Others focus on particular topics such as evaluation, the use of instructional objectives, or curriculum integration. They illustrate recurrent themes and historical antecedents and the curricular debates arising from and grounded in epistemological traditions. Furthermore, the issues raised in the handbook cut across a variety of subject areas and levels of education and how curricular research and practice have developed over time. This includes the epistemological foundations of dominant ideas in the field around theory, research, and practice that have led to marginalization based on race, class, gender, sexuality, ethnicity, age, religion, and ability. The book argues that basic curriculum issues extend well beyond schooling to include the concerns of anyone interested in how people come to acquire the knowledge, skills, and values that they do in relation to subjectivity and experience *An Introduction to Young Children With Delays and Disabilities* Richard M.

Gargiulo, Jennifer L. Kilgo, 2024-08-27 *An Introduction to Young Children With Delays and Disabilities Birth Through Age Eight* introduces readers to educational policies services and practices for future educators serving young children birth through age eight with delays and disabilities in early intervention early childhood special education EI ECSE Thoughtfully and comprehensively addressing the needs of young children and their families authors Richard M Gargiulo and Jennifer L Kilgo offer interventions and instructional techniques that provide students with a broad understanding of important theoretical and philosophical foundations including evidence based decision making cultural and linguistic responsiveness and appropriate instruction and interventions in classroom settings and beyond The Sixth Edition has been thoroughly updated to incorporate the Initial Practice Based Professional Preparation Standards for Early Interventionists Early Childhood Special Educators developed by the Division for Early Childhood DEC and Council for Exceptional Children CEC in 2020 as well as the DEC Recommended Practices Teaching Young Children Kristine Slentz, 2001-04 This is the third volume in our four volume book series Early Childhood Education This volume will explore both physical and social aspects of early education settings and applies principals to children with a range of abilities **Studyguide**, 2012 **Teaching Young Children Social Studies** Gayle Mindes, 2006-09-30 By linking theory to practice with an emphasis on national and state standards Head Start Performance Standards No Child Left Behind and IDEA the authors coherently combine principles of child development and social studies content to create a solid program for preschool through grade three The authors maintain the overriding idea throughout the Teaching Young Children series that strategies derived from knowledge of child development are used to teach content knowledge It is this concern that makes this volume an excellent resource for teachers and parents In addition to specific discussions of how to build and conduct a social studies curriculum the work includes vignettes of teachers and children in the classroom graphics illustrating concepts and methods and matrices charts and tables to enhance understanding The authors effectively intertwine social learning in young children and development of self concept with the theme based curriculum of the National Council for Social Studies the principles of multicultural education parent collaboration to support learning and creating connections between classroom and community *Teaching Young Children Mathematics* Janice Minetola, Robert Ziegenfuss, J. connections to the content *Contemporary Challenges in Teaching Young Children* Gayle Mindes, 2019-09-02

Contemporary Challenges in Teaching Young Children provides both veteran and aspiring early childhood educators with the information and tools they need to build on their understanding of developmentally appropriate practice. Teachers face many challenges including family configuration, social and political stressors related to accountability requirements, funding shortages, and the resulting need to teach with fewer resources. This innovative book focuses exclusively on problem solving at the classroom level and fosters creative methods of ensuring best practices are in place for all children, including those with limited experience in formal social settings and a lack of self-regulatory behaviors. Drawing on current research and their own wealth of experience, expert contributors cover topics from the critical importance of social-emotional learning to culturally responsive teaching to using technology to empower teachers and learners. Written in accessible, non-technical language, this book addresses complex factors affecting child development, guiding readers through the best strategies for tackling real problems in their practice. **Introduction to Early Childhood Education** Eva L.
