methods of teaching Dr M Rajakumar MraDheivamani, **Object Teaching and Oral Lessons on Social Science and Common Things** Henry Barnard, 1860 **Object Teaching and Oral Lessons on Social Science and Common Things** Henry Barnard, 2022-08-03 Reprint of the original first published in 1860 **Teaching**, 1921 **Teaching What We Do** Richard Todd, Douglas C. Wilson, 1992-12-07 What goes on in a college classroom For all that has been written in recent years about higher education very little attention has been paid to the heart of the matter teaching This book by members of the Amherst College faculty helps to repair that oversight Amherst in defining itself places a large emphasis as it should on the life of the classroom No faculty member no matter how senior is excused from teaching no cadre of graduate students shoulders the load of introductory courses To teach is the central mission of an Amherst professor But seldom the only mission Almost everyone who teaches at Amherst also pursues research Maintaining the balance is sometimes frustrating but more often nourishing and exhilarating In his foreword Peter R Pouncey speaks of the way in which teaching and research cross fertilize each other He writes of the rejuvenating invitation of the classroom to confront the mild curiosity of the good natured young and see it rise in the face of your own interests and insistences first to eagerness and then to the sort of passion you remember and hope to sustain in yourself Again and again these essays by artist historian critic and scientist demonstrate that the pleasures and challenges of the classroom are inexhaustible And they provide us with glimpses of the true importance of the work that is done there As Professor Benjamin DeMott writes in a successful class the student is free to

develop a thought to work up its implications to be unhurriedly serious about serious things in the company of attentive others At a time when the academy is under fire from various sides the reader will emerge from this book informed and heartened by its vision of the possibilities for higher education **Creative Teaching, Sustainable Learning** Ulrike Sievers,2017-11-09 There are many books on foreign language teaching this book is different because it focuses on the learner and the learning process It starts from the social nature of interactive learning and locates learning in a community of learners one of whom is the teacher The conditions for lasting learning in the foreign language are the basis for the teaching methods These aim to provide a rich and shared learning context offer individualised support and scaffolding for learning and make the language the medium for learning what learners are interested in as developing persons It makes teachers into reflective researchers of their practice thus ensuring that teaching is an art a craft and a science The best learning occurs when teachers can read the effects of their teaching on the learning behaviour of the pupils and are able to adapt their approach to be inclusive of all learning types The approach carefully developed in this book takes foreign language teaching and learning to a new level Without losing touch with its origins in Waldorf pedagogy it also draws on contemporary learning theory Above all it is an authentic account of the learning journey of a committed and caring teacher

Teaching Artist Handbook, Volume One Nick

Jaffe, Becca Barniskis, Barbara Hackett Cox, 2015-02-04 *Teaching Artist Handbook* is based on the premise that teaching artists have the unique ability to engage students as fellow artists. In their schools and communities, teaching artists put high quality art making at the center of their practice and open doors to powerful learning across disciplines. This book is a collection of essays, stories, lists, examples, dialogues, and ideas, all offered with the aim of helping artists create and implement effective teaching based on their own expertise and strengths. The Handbook addresses three core questions: What will I teach? How will I teach it? and How will I know if my teaching is working? It also recognizes that teaching is a dynamic process that requires critical reflection and thoughtful adjustment in order to foster a supportive artistic environment. Instead of offering rigid formulas, this book is centered on practice, the actual doing and making of teaching artist work. Experience based and full of heart, the *Teaching Artist Handbook* will encourage artists of every experience level to create an original and innovative practice that inspires students and the artist.

Chapters in the volume address curriculum design, teaching diverse learners and levels, the learning challenges of Chinese oral and literacy skills, grammar and vocabulary, discourse development, cultural understanding, and the affordances of a visit to China. Teaching at the University Level Dennis G.

A New Deal for Teachers Curtis Johnson, 2021-03-05 Teachers fully in charge of what matters for student and school success is now a movement growing steadily in nearly half the states of the U.S. According to a national survey, most teachers in America are unaware that this is a professional option. And because most thinking is about real school, it is apparently not safe for even scholars to talk about teachers being in charge. Nearly every book diagnoses the problem then defaults to a conventional remedy like chasing good principals. This book is aimed at raising the teacher-powered movement's visibility.

making it safe to talk about teachers in charge of schools showing how this arrangement erases the talent drain now plaguing the schools and offering evidence that students do better in these schools than they do in the conventional system The book outlines how the movement could get bigger faster And the massive institutional resistance to change that slows its progress And unlike most books the author sees teachers unions as part of the solution **The Enquiring Teacher** Susan Groundwater-Smith, Jennifer Nias, 2013-10-28 First Published in 1988 Throughout this book enquiring teachers is taken to mean those who are students on courses successful completion of which depends in part on their undertaking one or more enquiries into their own practice or that of their colleagues This Introduction presents some definitions and then discusses the implications for teachers who become students on enquiry based courses for the schools and colleges in which they teach and for the colleges polytechnics universities and teachers centres which mount and teach the courses
