It's August in New York, and the only thing that's hotter than the pavement is Manhattan. D.A. Alex Cooper's personal and professional life is just as she's claiming: an especially gratifying victory in a rape case. She gets the call: the body of a young woman has been found in an abandoned building. The brutality of the murder is disturbing enough, but when a second body is found in Brooklyn, beaten and disposed of in the exact same manner, the city's top brass want the killer found fast. Relying on razor-sharp instincts, a whip-smart partner, and one big break, Alex races to find the killer and keep him from killing again, even if it's at her own peril. The man who is the embodiment of the Mythbusters, Sherlock Holmes, and Richard Feynman weeds out the treasures from the shams in artifact investigations. Michael Shermer, founding publisher of *Skeptic* magazine, detailing how the pros determine whether an Abraham Lincoln signature is forged or if a photograph of Emily Dickinson is genuine. Nickell, a leader in forgery detection and forensic investigation, provides the essential tools necessary to identify counterfeits. In this general introduction to the principles of authentication, Nickell provides readers with step-by-step explanations of the science used to detect falsified documents, photographs, and other objects, illustrating methods used on hit shows such as *Antiques Roadshow* and *History Detectives*. Including fascinating cases drawn from Nickell's illustrious career, *Real or Fake* combines historical and scientific investigations to reveal reproductions and genuine objects. Nickell explains the warning signs of forgery, such as patching and unnatural pen lifts, chronicles the evolution of writing instruments, inks, and papers, shows readers how to date photographs, papers, and other materials, and traces the development of photographic processes since the mid-nineteenth century. Lavishly illustrated with examples of replicas and authentic objects inspected by Nickell, *Real or Fake* includes case studies of alleged artifacts, including Jack the Ripper's diary, a draft of the Gettysburg Address, notes by Charles Dickens, Jefferson Davis's musket, and debris from the Titanic. An expert on antique ink and paper and the forensic analysis of historic documents, The New Yorker Nickell advocates a multifaceted approach that looks at provenance, content, material composition, and scientific analysis. *Maine Antique Digest* **Indianapolis Monthly**, 2004-10 *Indianapolis Monthly* is the

[The Pickton File](#) Stevie Cameron, 2010-07-23 Stevie Cameron turns her renowned analytical eye from the crooks in suits of her previous books to the case of Vancouver's missing women and the man who has been charged with killing 27 of them, who if convicted will have the horrific distinction of being the worst serial killer in Canadian history. It's a shocking story that may not be over anytime soon. When the police moved in on Pickton's famous residence, the pig farm of Port Coquitlam, in February 2002, the entire 14-acre area was declared a crime scene, the largest one in Canadian history. Well over 150 investigators and forensics experts were required, including 102 anthropology students from across the country called in to sift through the entire farm, one shovelful of dirt at a time. A woman who is considered by many to be this country's best investigative journalist, Cameron has been thinking about the missing women of Vancouver's Downtown Eastside since 1998, when the occasional newspaper story ran about families and friends of some of the 63 missing women, agitating for action and being ignored by police and politicians. Robert William Willie Pickton has been on her mind since his arrest that February five years ago for the murders of two of the women, Mona Wilson and Sereena Abotsway, both drug-addicted prostitutes from the impoverished neighbourhood where all the missing women had connections. Living half-time in Vancouver for the last five years, Stevie Cameron has come to know many of the people involved in this case, from families of the missing women to the lawyers involved on both sides. She writes not only with tireless investigative curiosity but also with enormous compassion for the women who are gone and the ones who still struggle to ply their trade on the Downtown Eastside. We had no idea in 2002 how massive the investigation would be. We had no notion that the police would sift every inch of dirt on the Pickton farm, a process that lasted from the spring of 2002 to late 2004. We did not foresee the broad publication ban that would prevent any word printed or broadcast of what was being said in court, in case it influenced a potential juror. We couldn't know that there would be, by 2006, 27 charges of first-degree murder against Pickton and that the police would continue to investigate him on suspicion of many other deaths. And we didn't know that the police and other personnel involved in the case, under threat of ruined careers, were forbidden to talk to reporters. In blissful ignorance, all I could do was begin.

Excerpt from [The Pickton File](#) **An Introduction to the Work of a Medical Examiner** John J. Miletich, Tia Laura Lindstrom, 2010-02-26 Medical examiners play an increasingly important role in society as unexpected and violent deaths increase, not only due to crime but also due to new toxins in the environment, emerging diseases crossing from animals to humans, bizarre suicides, sadistic sexual practices, and other non-natural causes. John Miletich and Tia Lindstrom take us into the world of these medical detectives. Biological clues from bite marks and skin abnormalities to blood chemical levels and brain oxygenation are just some factors exposed in their quest for truth and justice. We learn the basics of death determination from rigor and livor mortis to signs of death by design, drug use, disease.

suicide and more We also come to understand the tools of this work from the Stryker s Saw to the grocer s scale and tests that reveal factors from DNA evidence to toxins from insect bites Each case begins with a biological mystery and ends with a conclusion that can provide loved ones with relief or shock Miletich who trained at the Alberta Office of the Chief Medical Examiner and with the Royal Canadian Mounted Police teams with Lindstrom to introduce readers to the medical examiner s role including autopsy techniques and analysis Twists and turns emerge as what was initially thought to be a murder proves to be suicide what was suspected to be a natural death proves to be murder or environmental poisoning or what was thought to be an accidental death proves to be something more sinister This work includes appendices with guides to Medical Examiner organizations seminars and conventions
