**Scoring the Rorschach** Robert F. Bornstein, Joseph M. Masling, 2005-03-23 Exner's Comprehensive System

has attracted so much attention in recent years that many clinicians and personality researchers are unaware that alternative Rorschach scoring systems exist. This is unfortunate because some of these systems have tremendous clinical value. Scoring the Rorschach: Seven Validated Systems provides detailed reviews of the best validated alternative approaches and points to promising new paths towards the continued growth and refinement of Rorschach interpretation. The editors set the stage with an extended introduction to historical controversies and cutting edge empirical methods for Rorschach validation. Each chapter presents a different Rorschach scoring system. A brief history is followed by detailed information on scoring and interpretation, a comprehensive summary of evidence bearing on construct validity and discussion of clinical applications, empirical limitations and future directions. A user friendly scoring manual for each system offers readers practical guidance. The systems tap a broad array of content areas including ego defenses, thought disorder, mental representations of self and others, implicit motives, personality traits and potential for psychotherapy. All psychologists seriously engaged in the work of personality assessment will find in this book welcome additions to their professional toolkits.

Interpersonal Sensitivity Judith A. Hall, Frank J. Bernieri, 2001-06 Interpersonal sensitivity refers to the accuracy and or appropriateness of perceptions, judgments and responses we have with respect to one another. It is relevant to nearly all aspects of social relations and has long been studied by social personality and clinical psychologists. Until now, however, no systematic or comprehensive treatment of this complex concept has been attempted. In this volume, the major theorists and researchers of interpersonal sensitivity describe their approaches both critically and integratively. Specific tests and methods are presented and evaluated. The authors address issues ranging from the practical to the broadly theoretical and discuss future challenges. Topics include sensitivity to deception, emotion, personality and other personal characteristics, empathy, the status of self reports, dyadic interaction, procedures, lens model approaches, correlational and categorical measurement approaches, thin slice and variance partitioning methodologies and others. This volume offers the single most comprehensive treatment to date of this widely acknowledged but often vaguely operationalized and communicated social competency.

Principles of Rorschach Interpretation Irving B. Weiner, 2003-07-18 This second edition of Irving Weiner's classic, comprehensive, clinician friendly guide to utilizing the Rorschach for personality description has been revised to reflect both recent modifications in the Rorschach Comprehensive System and new evidence concerning the soundness and utility of Rorschach assessment. It integrates the basic ingredients of structural, thematic, behavioral and sequence analysis strategies into systematic guidelines for describing personality functioning. It is divided into three parts. Part I concerns basic considerations in Rorschach testing and deals with conceptual and empirical foundations of the inkblot method and with critical issues in formulating and justifying Rorschach inferences. Part II is concerned with elements of interpretation that contribute to thorough utilization of data in a Rorschach protocol: the Comprehensive System search strategy, the complementary roles of projection and card pull in determining response characteristics and the interpretive significance of structural variables, content themes, test

behaviors and the sequence in which various response characteristics occur Each of the chapters presents and illustrates detailed guidelines for translating Rorschach findings into descriptions of structural and dynamic aspects of personality functioning The discussion throughout emphasizes the implications of Rorschach data for personality assets and liabilities with specific respect to adaptive and maladaptive features of the manner in which people attend to their experience use ideation modulate affect manage stress view themselves and relate to others Part III presents 10 case illustrations of how the interpretive principles delineated in Part II can be used to identify assets and liabilities in personality functioning and apply this information in clinical practice These cases represent persons from diverse demographic backgrounds and demonstrate a broad range of personality styles and clinical issues Discussion of these cases touches on numerous critical concerns in arriving at different diagnoses formulating treatment plans and elucidating structural and dynamic determinants of behavior

**Coping With Loss** Susan Nolen-Hoeksema, Judith Larson, Judith M. Larson, 2013-01-11 Coping With Loss describes the many ways in which people cope with the death of someone they love Most earlier books on bereavement have fallen into two categories distillations of the clinical experience of individual therapists or collections of chapters reporting the results of empirical studies Each category is valuable but has tended to serve a narrow group of readers practitioners with particular theoretical orientations or researchers in quest of the latest findings Coauthored by a leading research psychologist and an experienced therapist who specializes in bereavement education and intervention this book is different The authors weave together the strands of theory research and clinical wisdom into a seamless and readable narrative While they discuss previous work they also present new data never before published from one of the largest studies of bereaved people ever conducted the Bereavement Coping Project Unlike most studies to date which focused on only one type of bereaved group usually widows or widowers the Bereavement Coping Project examined the experiences of several different groups during the first 18 months after the death The groups included those who had lost a spouse a parent an adult sibling or a child and those who had lost their significant other to cancer or cardiovascular disease on one hand as opposed to the stigmatized disease of AIDS on the other The book begins with a critical overview of theories of bereavement succeeding chapters explore in depth the impact of specific types of loss the impact of particular coping strategies on recovery the impact of social supports and religion and the special cases of children and of people who seem to grow and change for the better after a loss A final chapter considers implications for intervention with bereaved people Each chapter is richly illuminated with real life examples throughout and ends with a section called Voices in which bereaved people describe their various attempts to cope in their own words Insightful and informative

**Facilitating Posttraumatic Growth** Lawrence G. Calhoun, Richard G. Tedeschi, 1999-07 In this book Calhoun and Tedeschi construct the first systematic framework for clinical efforts to enhance the processes they sum up as posttraumatic growth Posttraumatic growth is the phenomenon of positive change through struggle with even the most horrible sets of circumstances People who experience it tend to describe three general types of

change realistically stronger feelings of vulnerability that are nonetheless accompanied by stronger feelings of personal resilience closer and deeper relationships with others and a stronger sense of spirituality Posttraumatic growth has only recently become an important focus of interest for researchers and practitioners Drawing on a burgeoning professional literature as well as on their own extensive clinical experience the authors present strategies for helping clients effect all three types of positive change strategies that have been tested in a variety of groups facing a variety of crises and traumas Their concise yet comprehensive practical guide will be welcomed by all those who counsel persons grappling with the worst life has to offer     A Handbook of Clinical Scoring Systems for Thematic Apperceptive Techniques Sharon Rae

Jenkins,2007-08-30 This comprehensive volume brings together the best available clinical scoring systems for thematic apperceptive techniques TATs presented in research summaries along with practice stories and available scoring manuals A Handbook of Clinical Scoring Systems for Thematic Apperceptive Techniques raises awareness about the availability and usefulness of TAT scoring systems for research training and clinical practice provides the materials needed for learning and using the most useful available clinical systems and facilitates their use by making independent learning and systematic research easier This book should be in the library of every faculty member and clinical supervisor who is responsible for teaching courses in psychological assessment or supervising assessment students in clinical counseling school or forensic psychology whether in academic or practice settings practicum sites or internships     **Counseling and Psychotherapy**

**With Religious Persons** Stevan L. Nielsen,W. Brad Johnson,Albert Ellis,2001-05 This may be the most practical and user friendly guide to treating religious persons ever published Mental health professionals from all backgrounds will benefit from the author s detailed yet manual focused apprch to help overcome emotional distress     **Memory and Suggestibility in**

**the Forensic Interview** Mitchell L. Eisen,Jodi A. Quas,Gail S. Goodman,2001-09 This book is a comprehensive balanced up to date guide for all professionals involved in forensic interviewing who need to thread their way through current controversies about the nature of memory     **The Clinical and Forensic Assessment of Psychopathy** Carl B.

Gacono,2000-03 Psychopaths are difficult to ignore They are involved in many of today s most serious problems war drugs murder and political corruption As a construct psychopathy has evolved far beyond its confusing origins in a melange of labels into an empirically measurable syndrome The first text of its kind The Clinical and Forensic Assessment of Psychopathy A Practitioner s Guide translates the robust findings of the past 30 years into applied procedures and methods for all those whose work brings them into contact with this difficult population in mental health correctional or court settings Synthesizing the latest information on assessing psychopathy in children adolescents and adults it offers standard of care guidelines for the assessment of psychopathy in general and the use of the Hare Psychopathy checklists in particular It further develops conceptual models for understanding the information processing and emotional experience of psychopaths addresses legal and ethical issues discusses implications for training and the effective integration of psychopathy assessment

into general forensic practice interviewing predicting risk evaluating the relationship of psychopathy to malingering and writing reports describes dilemmas presented by the psychopath in the corporate setting and offers suggestions for managing them and for weighing the necessity of incorporating psychopathy assessment into institutional evaluation procedures and considers the relationship of psychopathy to sexual deviance substance abuse and the criminal personality The Clinical and Forensic Assessment of Psychopathy A Practitioner s Guide is a resource for anyone who seeks to make fast the link between research and practice Experienced professionals and their trainees and students alike will learn much from it *The Handbook of Forensic Rorschach Assessment* Carl B. Gacono, 2008 The Handbook of Forensic Rorschach Assessment underscores the unique contribution the Rorschach makes to forensic practice All of the chapters include the expertise of a licensed practicing forensic psychologist and offer a systematic approach to personality assessment in presenting use of the Rorschach in specific forensic contexts **The Psychological Assessment of Abused and Traumatized Children** , The Psychological Assessment of Abused and Traumatized Children Francis D.

Kelly, 1999-03-01 The past decade has seen more and more clinicians involved in the assessment and treatment of abused and traumatized children They have contributed to an impressively large body of literature on the impact of abuse and trauma at all ages the focus of which has been the short and long term sequelae apparent in the child s behavior emotional experience and social interaction But there have been few efforts to investigate the ways in which abuse and trauma damage the intrapsychic systems and structures that often guide direct and inform the child s manifest adjustment and functioning The need to redress the balance was the major impetus for this book Kelly offers a clinical paradigm for the personality assessment of abused or traumatized children via projective instruments the TAT and Rorschach and shows how various projective measures and indices can be utilized as sensitive barometers of changes in self object and ego functioning following therapeutic interventions and other corrective experiences But further integrating the tenets of trauma theory and those of psychoanalytic theory he sets this clinical paradigm in a meaningful theoretical context and draws on both theory and clinical experience to develop a comprehensive psychological composite of the child who has been maltreated Part I provides an overview of theoretical models relevant to the assessment and diagnosis of the maltreated child Contemporary psychoanalytic theory serves as one frame and is discussed first with particular emphasis on object relations and ego functions Equal attention is devoted to developmental psychology as another frame Part II reviews relevant research The Mutuality of Autonomy Scale MOA and the Social Cognition and Object Relations Scale SCORS are introduced as examples of reliable and valid instruments readily employed to assess the impact of abuse or trauma on a child s object relations functioning Additional Rorschach indices boundary disturbance measures thought disorder indices trauma markers and defensive functions measures are discussed as measures of the impact on different facets of ego functioning These various projective measures can be utilized as sensitive barometers of changes in self object and ego functioning following

therapeutic interventions and other corrective experiences Part III includes a variety of extended clinical illustrations Seven cases of boys and girls subjected to varying degrees of abuse and trauma are presented to demonstrate the clinical utility of projective material for assessment diagnosis and treatment planning For the clinician who takes the idiographical phenomenological approach appropriate given the uniqueness of each situation of abuse or trauma and the frequent brevity and barrenness of the protocol such material can open a window onto a rich vista of the child s psychological terrain The resulting map can point the way to wise decisions about type timing and level of therapeutic intervention the resolution of such process issues as transference and countertransference plus additional questions Two cases of adult women who were abused as children and find themselves continuing to struggle with enduring unresolved issues vis a vis their own children are also presented These cases underscore the value of TAT and Rorschach material and object relations measures in assessing and understanding the abusive and potentially abusive parent
