*Technics and Human Development*, 1971      **The Myth of the Machine** Lewis Mumford, 1971      Technics and Human Development Lewis Mumford, 1971-09 Mumford explains the forces that have shaped technology since prehistoric times and shaped the modern world He shows how tools developed because of significant parallel inventions in ritual language and social organization It is a stimulating volume informed both with an enormous range of knowledge and empathetic spirit Eliot Fremont Smith New York Times Index photographs      The Myth of the Machine Lewis Mumford,      Technics and Human Development Lewis Mumford, 1974      **The Myth of the Machine** Lewis Mumford, 1967 Bibliography v 2 p 439 469      **The Pentagon of Power** Lewis Mumford, 1970 Examines contemporary man's preoccupation with technology appraising mass production and automation and their by products including pollution mass destruction and waste      *The Myth of the Machine, Vol. 2* Lewis Mumford, 1970      *Myth of the Machine* Lewis Mumford, 1997-03-01      **Max Weber's Theory of the Modern State** A. Anter, 2014-02-19 Andreas Anter reconstructs Max Weber's theory of the modern state showing its significance to contemporary political science He reveals the ambivalence of Weber's political thought the oscillation between an statist position mainly oriented to the reason of state and an individualistic one focussed on the freedom of individuals      Philosophy of Technology Maarten J Verkerk, Jan Hoogland, Jan van der Stoep, Marc J. de Vries, 2015-09-16 Philosophy of Technology An introduction for technology and business students is an accessible guide to technology's changes their ubiquitousness and the many questions these raise Designed for those with no philosophical background in mind it is ideal for technology and engineering students or specialists who want to learn to think critically about how their work influences society and our daily lives The technological business environment and daily experiences are the starting point of the book and the authors reflect upon these practices from a philosophical point of view The text goes on to present a critical analysis of the subject including development manufacturing sales and marketing and the use of technological products and services The abstract ideas are made easier to grasp with a story telling approach a vivid history of the discipline and colourful portraits of the core thinkers in this domain as well as four case studies drawing from various engineering disciplines to demonstrate how philosophy can and should influence technology in practice The first comprehensive introduction to this vibrant young sub discipline in over 20 years this is an ideal textbook for students of technology and engineering beginning a course or project in the philosophy of their subject      **Trajectory of the 21st Century** Lawrence J. Terlizese, 2009-01-10 Trajectory of the Twenty first Century explores what many prophets of the twentieth century such as Oswald Spengler Paul Tillich Aldous Huxley Jacques Ellul and others have predicted would transpire in the current century Their vision included an out of control technological system and a return to religious sentiment that will ultimately undermine the system to which it is reacting This book aims to accurately present their

positions and draw certain logical conclusions from them that pertain to the course of history in our time The book's theme argues that modernity is a secularized version of millennial Christianity which reaches its fullest development in the twenty first century and will regress into what Russian philosopher Nicholas Berdyaev called the new Middle Ages or a new religious period This will mean the twilight of modern technological society as its values of rationalism give way to a post-rationalist society Ironically decline will come through further technological advance Omnicide threatens through religious world war driven by transcendent values and modern weaponry Jihadist thinking and posthumanist technology both establish the omnicidal mentality New technologies such as genetic engineering and artificial intelligence created under millennial inspiration to reach for immortality could potentially bring an end to the human species either through a slow steady obsolescence or through environmental catastrophe The titanic forces of technological progress and regress are on a direct collision course in the twenty first century
