Technion The Story Of Israels Institute Of Technology:

Technion Carl Alpert, American Society for Technion, Israel Institute of Technology, Tekhniyyon-Makhon tekhnologi le-Yisrael, *History of Higher Education Annual* Roger Geiger, 1991-01-01 **Boycott Theory and the Struggle for Palestine** Nick Riemer, 2022-12-13 The academic boycott of Israel a branch of the pro Palestinian Boycott Divestment and Sanctions BDS campaign is one of the richest and most divisive topics in the politics of knowledge today In *Boycott Theory and the Struggle for Palestine* Nick Riemer addresses the most fundamental questions raised by the call to sever ties with Israeli universities and offers fresh arguments for doing so More than a narrow study of the boycott campaign the book details how academic BDS relates to a range of live controversies in progressive politics on questions such as disruptive protest silencing and free speech the real world consequences of intellectual work the rise of the far right and the nature of grassroots campaigning Written for open minded readers the book presents the fullest justification for the academic boycott yet given considering BDS efforts on campuses around the world The opening chapters explore the fundamentals of the academic boycott campaign detailing the conditions on the ground in Palestinian and Israeli higher education and analyzing debates over the boycott and its adoption or resistance in the west The later chapters contextualize the boycott with respect to broader questions about the links between theory and practice in political change Directly rebutting the arguments of BDS s opponents *Boycott Theory and the Struggle for Palestine* demonstrates the political and intellectual soundness of a controversial and often misrepresented campaign In defending an original view of the differences between reflecting on politics and doing it in the specific context of the liberation of Palestine the book s arguments will have a resonance for many wider debates beyond the context of either universities or the Middle East [The History of Architectural Education in the Middle East and North Africa](#) Farhan Karim, Mohammad Gharipour, 2024-12-31 *The History of Architectural Education in the Middle East and North Africa* explores the varied socio political landscapes within which different architectural programs and schools were established across Middle Eastern and North African countries It addresses a significant gap in our understanding of the diverse strategies and paths through which architectural pedagogy underwent institutionalization and standardization during nineteenth and twentieth centuries This process of modernization was greatly influenced by rapidly evolving socio economic conditions and the interests of the real estate market Concurrently architectural educators and institutions responded to public demands for more inclusive urban environments shaping the social ambitions and expectations of emerging modern cities Karim and Gharipour present an interconnected and parallel history of these institutions through a series of case studies They argue that architectural pedagogy and its stakeholders didn t solely shape the technical discourse of the building industry Instead their activism and advocacy collectively ignited epistemological debates concerning the perception of modern urban society and its direction **Arieh Sharon and Modern Architecture in Israel** Eran Neuman, 2023-11-30 *Arieh Sharon and Modern Architecture in Israel Building Social Pragmatism* offers the

first comprehensive survey of the work of Arie Sharon and analyzes and discusses his designs and plans in relation to the emergence of the State of Israel. A graduate of the Bauhaus, Sharon worked for a few years at the office of Hannes Meyer before returning to Mandatory Palestine. There he established his office which was occupied in its first years in planning kibbutzim and residential buildings in Tel Aviv. After the establishment of the State of Israel in 1948, Arie Sharon became the director and chief architect of the National Planning Department where he was asked to devise the young country's first national masterplan. Known as the Sharon Plan, it was instrumental in shaping the development of the new nation. During the 1950s and 1960s, Sharon designed many of Israel's institutions including hospitals and buildings on university campuses. This book presents Sharon's exceptionally wide range of work and examines his perception of architecture in both socialist and pragmatist terms. It also explores Sharon's modernist approach to architecture and his subsequent shift to Brutalist architecture when he partnered with Benjamin Idelson in the 1950s and when his son Eldar Sharon joined the office in 1964. Thus the book contributes a missing chapter in the historiography of Israeli architecture in particular and of modern architecture overall. This book will be of interest to researchers in architecture, modern architecture, Israel studies, Middle Eastern studies, and migration of knowledge.

International Dictionary of University Histories Mary Elizabeth Devine, Carol Summerfield, 2013-12-02. Modeled on Fitzroy Dearborn's highly successful International Dictionary of Historic Places, the International Dictionary of University Histories provides basic information on 200 institutions, location, description, sources of further information, followed by an extensive 3000 to 5000 word essay on each university's history. Entries on each university conclude with a Further Reading list and most entries are illustrated. Coverage is world wide and entries range from the great medieval institutions Oxford, Heidelberg, the Sorbonne to the great historic universities of the United States to the newer universities of Australia and South Africa to the lesser known universities of India, China, and Japan. More than 200 writers, researchers, and archival departments of the universities themselves have contributed to the Dictionary. Entries include those universities with the most fascinating histories and those that have played important roles in the development of their own countries and in the furtherance of world scholarship.

Encyclopedia of Judaism Sara E. Karesh, Mitchell M. Hurvitz, 2005. An illustrated A to Z reference containing over 800 entries providing information on the theology, people, historical events, institutions, and movements related to the religion of Judaism.

[The History of Israel](#) Arnold Blumberg, 1998-08-27. Every school and public library should update its resources on the history of Israel with this engagingly written and succinct narrative history from biblical times through 1997. This readable history based on the most recent scholarship provides a chronological narrative that examines the political, religious, and social components of Israel's turbulent history. A thorough examination of the events from the Six Day War of 1967 through the struggle for peace in 1997 is of special interest. The work provides a timeline of events in the history of Israel, biographical sketches of key figures in Israeli history, and an annotated bibliography of books of interest to students and general readers. The prologue gives an

overview of the land its government resources and culture The first few chapters describe the earliest history of the land through the 19th century settlement of European Jews seeking to escape persecution and to build a Jewish state Following the Holocaust refugees poured into the region and political and military struggle culminated in the birth of the State of Israel in 1948 Blumberg an expert on the history of Israel then details the years of growth and successive wars with Israel's Arab neighbors from 1948 through 1973 In an extended discussion he examines the political turbulence within Israel from the late 1970s through 1997 Israel's relations with its neighbors and the international community and the progress and setbacks in the struggle for peace between Israel and the Arabs

Information Transfer: The Editor's Role M. Balaban, 2012-12-06 It was Faraday who in 1821 said that there are three necessary stages of useful research The first to begin it the second to end it and the third 1 to publish it There has since indeed been so much research and publication that we have become increasingly alarmed by the galloping proliferation of scientific information produced in relation to the user's ability to retrieve and consume it effectively conveniently and creatively In 1948 to deal with this concern the Royal Society Scientific Information Conference held in London spanned the whole realm of scientific information Sir Robert Robinson President of the Royal Society in his opening address noted that the study of scientific information services in all its ramifications has enormous scope and the London conference dealt with scientific publication format editorial policy subject grouping organization abstracting reviews classification indexing

and training of information officers It was about this time that information science began to develop more on the retrieval end so it seems logical that the first editors group founded in 1949 was ICSU AB the International Council of Scientific Unions Abstracting Board In 1958 the National Academy of Sciences International Conference of 2 Scientific Information in Washington limited its interests and expanded on the later phases of the life cycle of information storage and retrieval
