Orenstein, Freyda Spira, Peter Fuhring, Donald J. La Rocca, Anne Varick Lauder, Christof Metzger, Femke Speelberg, Ad Stijnman, Pierre Terjanian, Julia Zaunbauer, 2019-10-21 The Renaissance of Etching is a groundbreaking study of the origins of the etched print Initially used as a method for decorating armor etching was reimaged as a printmaking technique at the end of the fifteenth century in Germany and spread rapidly across Europe Unlike engraving and woodcut which required great skill and years of training the comparative ease of etching allowed a wide variety of artists to exploit the expanding market for prints The early pioneers of the medium include some of the greatest artists of the Renaissance

such as Albrecht Dürer, Parmigianino and Pieter Bruegel the Elder who paved the way for future printmakers like Rembrandt, Goya and many others in their wake. Remarkably, contemporary artists still use etching in much the same way as their predecessors did five hundred years ago. Richly illustrated and including a wealth of new information, *The Renaissance of Etching* explores how artists in Germany, the Netherlands, Italy and France developed the new medium of etching and how it became one of the most versatile and enduring forms of printmaking.
