Advanced Techniques in Liposuction and Fat Transfer Nikolay Serdev, 2011-09-12 Liposuction is the first cosmetic procedure to change beautification surgery from open extensive excision surgery into a more atraumatic closed one It gave

rise to the modern understanding of minimally scarring and minimally invasive surgery and changed the understanding and preferences of both patients and doctors. It also became the most common procedure in cosmetic surgery world wide practiced by an increased number of physicians from various specialties. The techniques of fat grafting closely bound with liposuction have found widespread application and fat stem cells seem to be changing the future of many areas in medicine. Turning the pages the reader will find a lot of information about advances, tips and tricks as well as important milestones in the development of the different methods available such as classic power ultrasound laser and radio frequency assisted liposuction etc. Most useful anesthesia techniques are described and discussed and guidelines have been established for medical indications. Special attention is paid to good patient selection, complications and risks.

Mohs Micrographic Surgery Keyvan Nouri, 2012-02-15. This book is written for dermatologists, otolaryngologists, facial plastic surgeons and any physician who want to provide state of the art treatment for skin cancer patients. Considering the high incidence of non melanoma skin cancers such as Basal Cell Carcinoma and Squamous Cell Carcinoma accounting for over one million cases per year in the United States and since Mohs Micrographic Surgery has become the treatment of choice for these skin cancers, the popularity of this technique has been increasing dramatically worldwide.
