The Growth of the British Economy 1918-1968 G. A. Phillips,R. T. Maddock,2021-11-21 Originally published in 1973 the aim of this work was to discuss the various factors governing the rate of growth of the British economy since the First World War It endeavours to explain or at least to provide the groundwork for an explanation of the movements of aggregate production and productivity in this period In so doing it examines two particular and partly antithetical questions why Britain exceeded the predictions of economic theorists who until at least the Second World War had forecast a retardation of growth in all mature industrial economies and why especially since 1950 the economy has expanded less quickly than many professional economists and almost all politicians thought possible The authors look in turn at the changing trends in effective economic demand both domestic and foreign the supply of labour and capital and the role of management and the state in fostering growth Their object is to produce a balanced mixture of the available historical and statistical evidence and the relevant economic theory They introduce their readers at the same time to the more specialized works of both disciplines The book is the product of a fruitful collaboration between an economist and a historian both with considerable experience in teaching students combining their two subjects It marries accordingly the qualities of apt and informative use of evidence wide ranging theoretical discussion and clarity of exposition
