Lawson,2017-03-02 Regionalism has regained momentum in the post Cold War era New economic groupings continue to spring up across the globe while older regional organizations have strengthened their institutional bases and broadened their scope Explaining the reinvigoration of regionalism requires comparative analyses that not only highlight the commonalities that characterize various regional experiments but also account for the differential outcomes and divergent trajectories such projects exhibit This collection of seminal articles on regionalism advances theoretical concepts that can stimulate useful comparisons along with scholarly surveys of important instances of regionalism in the contemporary world Besides classic studies of the European Union the volume includes authoritative overviews and case studies of regionalist projects in East Asia Sub Saharan Africa Latin America the Middle East and Central Eurasia An introductory essay situates these articles in the context of the five decade long research program on regional integration theory **Capitalism, Dependency and Ultra-Imperialism** Hartmut Elsenhans,2023-10-13 This book assembles main contributions to an alternative explanation of globalisation and the political economic structures of the international system As the result of capitalism globalisation does not transfer basic capitalist structures from the Centre to the Periphery Capitalism is based on rising mass incomes that create investment opportunities and thus the possibility of profit A structurally homogeneous and ultraimperialist Centre dominates a deeply fissured Periphery of structurally heterogeneous societies and economies Capitalism penetrates underdeveloped regions and deforms them through rent which obstructs expanding internal mass markets while labour goes unempowered Rent constitutes the basis for state operations and the role of emerging state classes While globalisation disempowers labour in both the West and in the South it has given new comparative advantage to the South The shift from rent appropriation in the South via raw material exports to export led manufacturing is based on devaluation below purchasing power parity and hence on a rent from agriculture that is based on the Green Revolution Its impact is however not always sufficient to compensate for the loss of influence experienced by social reformist forces A novel multipolar system based on the balance power has emerged Mutliethnic empires are held together with large varieties of however always identitarian ideologies This global system is composed of powers that are internally and externally opposed to peaceful

The Mid-Victorian Generation K. Theodore Hoppen, 2000-06-30 This the third volume to appear in the *New Oxford History of England* covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history

more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen s study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation **The Palgrave**

Elsenhans,2006 There are different types of globalization Today s globalization is characterized by the worldwide disempowerment of labor This is the result not of low real wages in backward countries but of devaluation driven exports from relatively prosperous catch up countries An alternative form of globalization the convoy model is possible if the causes of devaluation driven exports are eliminated This does not call for a worldwide alignment of labor costs but worldwide full employment policies The latter require a strong state in labor surplus economies of the underdeveloped South in addition to social and economic reforms in favor of the poor **Economic Activities Under the Japanese Colonial Empire** Minoru Sawai,2016-05-27 The main focus of this edited volume is an examination of dynamic relationships among Japan Taiwan Korea and the northeastern region of China and the economic development of each area in East Asia from the 1910s to the end of World War II The development of foreign trade in East Asia the relations between industrialization and consumption in Korea the transactions in fertilizers and the development of small scale industries in Taiwan are precisely examined At present East Asia is a major economic center of the world It is necessary to look closely not only at both sides of the exploitation or development under colonization paradigm but also at the prewar factors that spurred East Asian economic growth in the postwar decades A noteworthy characteristic of the Japanese colonial empire was the close economic and geographic relations among Japan Taiwan Korea and the northeastern region of China Economic integration within the empire strengthened considerably in the interwar years and remained high even during the war as compared to that in European countries and their colonies What was the irreversible change in each colonial economy by means of forced incorporation into the Japanese empire What was the impact on economic subjects such as merchants manufacturers managers and workers through the colonial regime This book provides readers with broad perspectives that are indispensable given that the factors discussed herein are the historical origins of current issues
