were commissioned to examine the current state of affairs and residual issues with respect to achievement level setting in NAEP and to help determine whether the models and methods used in other disciplines have useful application to education. It is important to note that the papers represent the authors' views, not necessarily those of the committee or National Research Council. This issue and the workshop discussion point out a number of analogies between the objectives, requisite data, judgment requirements, and policy issues for NAEP and other applications. The editors hope that this issue and wide distribution of these papers will prompt others to join in this interesting analysis and debate.
