Ideology and Soviet Politics Alex Pravda, Stephen White, 1988-07-26 The official ideology of Marxism Leninism is central to Soviet politics and yet its development in recent years has received very little scholarly attention In this book a group of leading specialists drawn from both sides of the Atlantic advance decisively upon all earlier discussions of this subject to provide both an authoritative and detailed picture of the development of official ideology from the early years up to Gorbachev s 1986 Party Programme as well as a consideration of the changing role of ideology in Soviet foreign and domestic policy making The book will be required reading for all students of Soviet and communist politics it should also be of interest to a wider non specialist audience

The

Politics of Soviet Education George Z. F. Bereday, 2003-01-01 **Politics, Modernisation and Educational Reform in Russia** David Johnson, 2010-05-17

The chapters in this volume give an account of the process of modernisation and educational reform in Russia variously considering the cultural and political dilemmas provoked by democratisation the structural and policy challenges associated with the reform of higher and vocational education and the deep divisions exposed as socio cultural activity is brought into alignment with the new discourse of freedom and choice The volume stimulates an important debate about the methods that inform cross national and cross regional work on educational change This is particularly salient in a study of educational reform in Russia and begs the question whose way of thinking of constructing meaning and of experiencing the world is used to judge the weight and the direction of change Each chapter shows that a thorough understanding of the nature of change and the direction of reform is only achieved through the ability to decentre or take on board the other worldview It argues therefore that it is worldview rather than culture or nation state that is the most valid unit of analysis This book pays tribute to K D Ushinsky 1824 70 the Russian pioneer of comparative education each chapter in it broadly in agreement with his conclusions that Public education does not solve the problems of life by itself it does not lead history rather it follows the historical development It is not the pedagogies or the teachers who create the future but the people themselves and their great men Education only follows this road and in combination with other public social factors helps the individual and the rising generation on its way
