Soviet Regional Elite Mobility After Khrushchev:

Soviet Regional Elite Mobility After Khrushchev Wiliam A. Clark, 1989-07-21 Clark's groundbreaking study covers the period in Soviet political history from the fall of Nikita Khrushchev in late 1964 through the spring of 1987 and examines the forces affecting regional elite mobility throughout the Soviet Union during these years. Turning the explanatory focus away from the traditional areas of patronage and clientelism, Clark adopts a novel approach to the subject by concentrating on structural variables such as the economic, social, and demographic aspects of the regions themselves as key elements of an explanation for long-term mobility trends. In addition to his focus on non-traditional variables, the broad chronological scope of the study and the fact that all Soviet republics with equivalent party structures are examined make Clark's work especially valuable for graduate students and scholars of Soviet politics and government seeking a more general and inclusive explanation of regional elite mobility than has been available in previous studies of the subject. The study is based on an exhaustive examination of the careers of over 275 Obkom regional party committees' First Secretaries. As a result of this analysis, the 129 regional party structures of the USSR are ranked hierarchically with respect to political mobility. Throughout the study, Clark seeks to isolate non-idiosyncratic variables to explain the significant variance in mobility opportunities offered by the various regional party units. Thus, rather than relying on the traditional personalistic variables, Clark seeks to identify independent variables that have explanatory value throughout the Soviet system. Finally, Clark examines the effects of background characteristics and functional career types on elite mobility at the Obkom tier and analyzes changes in regional cadres' policy after Brezhnev. Six appendices provide additional information for the student and researcher. **Soviet**

Willerton, 1992 How do Soviet politicians rise to power How are national and regional regimes formed How are conflicting political interests brought together as policies are developed in the Soviet Union In *Patronage and Politics in the USSR* first published in 1991 Professor John Willerton offers major insights into the patronage networks that have dominated elite mobility regime formation and governance in the Soviet Union during the past twenty five years Using the biographical and career details of over two thousand national leaders and regional officials in Azerbaijan and Lithuania John Willerton traces the patron client relations underlying recruitment mobility and policymaking He explores the strategies of power consolidation and coalition building used by Soviet chief executives since 1964 as well as the institutional links and policy outcomes that have resulted from network politics The author also assesses the manner and extent to which leaders in politically stable and less stable settings spanning different national cultural contexts have relied upon patronage networks to consolidate power and to govern Finally Professor Willerton explores how in a period of dramatic change patron client networks may have given way to institutionalised interest groups and political parties *Chinese Provincial Leaders* Zhiyue Bo, 2019-09-17 Based on biographical data on more than 2 500 individuals in China's thirty provincial units from the beginning of the People's Republic in 1949 this is the most comprehensive and systematic treatment of China's provincial leaders ever published The study presents detailed accounts of four categories of provincial leaders party secretaries deputy party secretaries governors and vice governors including age gender nationality hometown education party membership and length of membership It also traces the careers of these leaders in terms of promotion demotion transfer and retirement And using sophisticated statistical analysis it links the political mobility of these leaders to the economic performance of their

provincial units **Crime and Punishment in Soviet Officialdom** William A. Clark, 1993 An analysis of political corruption and attempts to battle it in the Soviet elite without the usual baggage of moral indignation and finger pointing Examines how corruption fit into the structure of the bureaucracy and the society attitudes toward it data on its prevalence the politics and methods of combating it and the future of reform in the successor states Paper edition unseen 16 50 Annotation copyright by Book News Inc Portland OR *Development in Central Asia and the Caucasus* Sophie Hohmann, Claire Mouradian, Silvia Serrano, 2014-06-25 After the final collapse of the Soviet Union the so called last empire in 1991 the countries of Central Asia Kazakhstan Kyrgyzstan Uzbekistan Tajikistan Turkmenistan and of the Caucasus Armenia Azerbaijan Georgia became independent nations These countries previously production centres under the socialist planning system of the Soviet Union have made enormous economic adjustments in order to develop or attempt to develop along capitalist lines As this study will show however inequality in Central Asia and the Caucasus is widening as the Soviet systems of healthcare and state provisions disappear Rejecting the Cold War era East West paradigm often used to analyse the development of these nations this study analyses development along the North South lines which characterise the migration patterns and poverty levels of much of the rest of the developed world This opens up new avenues of research and helps us understand why it is for instance that this region is better characterised as a new South as skilled workers flood out of the territories and into Russia and Western Europe Development in Central Asia and the Caucasus draws together detailed analyses of the development of migration economics as the region s oil wealth further enhances its strategic and economic importance to Russia the US the Middle East and to the EU The Soviet Administrative Elite Kenneth C. Farmer, 1992-04-16 An analytical study of the Soviet political elite as a body from 1917 to 1990 Focusing on the changing structure of the elite it is based partly on Kenneth C Farmer s database consisting of biographical and career data on over 1500 high level leaders **Chinese Provincial Leaders** Alan M. Glassman, Deone Zell, Shari Duron, 2005 An emergent approach to organizational strategy making assumptions that few organizations actually realize the goal of deliberative top down strategic planning and that effective strategy making occurs on a continual basis and is a shared activity of the entire organization This innovative book provides the first in depth look at how real organizations are formulating and implementing strategic change under this new paradigm The authors have dug deep into three large and varied organizations Hewlett Packard the California State University system and the County of Los Angeles and identified each one s efforts to develop a new strategic planning process better suited to match the current pace of change and environmental unpredictability The book is filled with vignettes quotes and real world examples that illustrate the trend toward faster more adaptive strategic planning processes It is relevant for a wide range of business governmental and non profit settings and should be required reading in any course on strategic planning **After The Cold War** Charles Kegley, 2021-11-28 This is a text on the traditional questions of nuclear deterrence and the unconventional answers suggested by the emerging new world

order These widely ranging essays by scholars policymakers and moral philosophers present rival ideas about the morality of alternative means for preserving mutual security as the world moves beyond the Cold War
