Sowing the Seeds of Democracy in China Merle Goldman, 1994 When they found their efforts had produced negligible results they tried to introduce new institutions such as a free press a legislature with real power the rule of law and truly competitive elections

From Comrade to Citizen Merle Goldman, 2007-09-30 A leading scholar of China's modern political development examines the changing relationship between the Chinese people and the state Correcting the conventional view of China as having instituted extraordinary economic changes but having experienced few political reforms in the post Mao period Merle Goldman details efforts by individuals and groups to assert their political rights China's move to the market and opening to the outside world have loosened party controls over everyday life and led to the emergence of ideological diversity Starting in the 1980s multi candidate elections for local officials were held and term limits were introduced for communist party leaders Establishment intellectuals who have broken away from party patronage have openly criticized government policies Those intellectuals outside the party structures because of their participation in the Cultural Revolution or the 1989 Tiananmen Square demonstrations have organized petitions published independent critiques formed independent groups and even called for a new political system Despite the party's repeated attempts to suppress these efforts awareness about political rights has been spreading among the general population Goldman emphasizes that these changes do not guarantee movement toward democracy but she sees them as significant and genuine advances in the assertion of political rights in China

Deng Xiaoping Alexander V. Pantsov, Steven I. Levine, 2015-04-01 Deng Xiaoping joined the Chinese Communist movement as a youth and rose in its ranks to become an important lieutenant of Mao's from the 1930s onward Two years after Mao's death in 1976 Deng became the de facto leader of the Chinese Communist Party and the prime architect of China's post Mao reforms Abandoning the Maoist socio economic policies he had long fervently supported he set in motion changes that would dramatically transform China's economy society and position in the world Three decades later we are living with the results China has become the second largest economy and the workshop of the world And while it is essentially a market economy socialism with Chinese characteristics Deng and his successors ensured the continuation of CCP rule by severely repressing the democratic movement and maintaining an iron grip on power When Deng died at the age of 92 in 1997 he had set China on the path it is following to this day Alexander Pantsov and Steven Levine's new biography of Deng Xiaoping does what no other biography has done based on newly discovered documents it covers his entire life from his childhood and student years to the post Tiananmen era Thanks to unprecedented access to Russian archives containing massive files on the Chinese Communist Party the authors present a wealth of new material on Deng dating back to the 1920s In a long and extraordinary life Deng navigated one epic crisis after another Born in 1904 Deng like many Asian revolutionary leaders spent part of the 1920s in Paris where he joined the CCP in its early years He then studied in the USSR just as Stalin was establishing firm control over the Soviet communist party He played an

increasingly important role in the troubled decades of the 1930s and 1940s that were marked by civil war and the Japanese invasion. He was commissar of a communist dominated area in the early 1930s, loyal henchman to Mao during the Long March, regional military commander in the anti Japanese war and finally a key leader in the 1946-49 revolution. During Mao's quarter century rule, Deng oscillated between the heights and the depths of power. He was purged during the Cultural Revolution only to reemerge after Mao's death to become China's paramount leader until his own death in 1997. This objective, balanced and unprecedentedly rich biography changes our understanding of one of the most important figures in modern history.

Mao's China and the Cold War Jian Chen, 2010-03-15 This comprehensive study of China's Cold War experience reveals the crucial role Beijing played in shaping the orientation of the global Cold War and the confrontation between the United States and the Soviet Union. The success of China's Communist revolution in 1949 set the stage. Chen says The Korean War, the Taiwan Strait crises and the Vietnam War, all of which involved China as a central actor, represented the only major hot conflicts during the Cold War period, making East Asia the main battlefield of the Cold War while creating conditions to prevent the two superpowers from engaging in a direct military showdown. Beijing's split with Moscow and rapprochement with Washington fundamentally transformed the international balance of power, argues Chen, eventually leading to the end of the Cold War with the collapse of the Soviet Empire and the decline of international communism. Based on sources that include recently declassified Chinese documents, the book offers pathbreaking insights into the course and outcome of the Cold War.

Zhao Ziyang and China's Political Future Guoguang Wu, Helen Lansdowne, 2013-05-13 What legacies have previous reformers like Zhao Ziyang left to today's China? Does China have feasible political alternatives to today's repressive market Leninism and corrupt state capitalism? Does Zhao's legacy indicate an alternative to the past and for the future? For those who are familiar with the development of Chinese politics since the reform years, Zhao is now widely regarded as a major architect of the nation's profound transition. His contributions to China's post Mao development are rich and multi-faceted, including those on rural and urban economic reforms, extending to accountable governance, liberal policies concerning domestic affairs and China's foreign relations. Featuring contributions from leading experts in the field, such as Richard Baum and Xiaonong Cheng, this book explores the historical development of China's political reform issues and how his political legacies are relevant to China's political development since the 1980s to the future. Using recently translated recollection articles by veteran reformers who worked with Zhao in the 1980s, like Du Runsheng, An Zhiwen, Li Rui, Bao Tong, Zhao Ziyang and China's Political Future is a valuable contribution for students and researchers interested in the Chinese politics, Asian politics and political development in Asia.

Support for Economic and Political Change in the China Countryside Samuel James Eldersveld, Mingming Shen, 2001-01-01 Samuel J. Eldersveld and Mingming Shen, the authors of this important two-wave study, illuminate a unique and richly contoured view of Chinese attitudes about political and economic reform. They base their findings on the responses of a panel of over 800 mass respondents, approximately 1,300

interviews with villagers and 250 interviews with cadres The authors provide extensive analysis of their data and find that the level of popular support for reform and support for democratic values is surprisingly high Of particular interest is the examination of support for political specifically citizen participation contacting officials attending party and village meetings and voting for village committees The authors find significant variance in mass and cadres beliefs but Eldersveld and Shen s findings provide impressive new data for the study of economic and political development in China and the possibility of democracy in the future

Paradoxes Of China's Prosperity: Political Dilemmas And Global Implications Guoguang Wu, 2015-01-15 The world seems divided to either applaud or fear the rise of China but this book probes deeper by investigating three aspects of the phenomenon in detail 1 the institutional dilemmas of the prosperity as it integrates Asian authoritarianism with globalizing capitalism to create economic accomplishments 2 the political struggles alongside the prosperity as Chinese citizens begin to demand equality rights and justice that might be viewed to disturb the continuity of stability and development and 3 the global implications entailed by the prosperity not only in power politics war and peace or competitions among nations but especially on global public goods termed human security Articles included here combine political economic analyses lens with historical depth and global concerns to add a perspective that highlights the paradoxes of prosperity surrounding the ongoing debate on the rise of China and its global ramifications Readers will find an analysis that goes beyond the dichotomy viewing the rise of China either in positive or negative perspectives Investigations on the internal dilemmas and the global implications of the rise of China are well situated in the historical context of China s own search for modernization since the late 19th century This is one of the few books in which China s rise is examined from a global perspective rather than from a national perspective of China the United States or any other specific nation a global perspective that addresses the challenges facing all human societies with the rise of China

Restructuring Political Power in China An Chen, 1999 Chen argues that to prevent party cadre opposition to market restructuring the nemesis of change in other communist states national leaders manipulated legislative channels and party regulations to allow citizen participation in the implementation of reform programs Opportunistic realignments at the political level involving the central leadership local party cadres and ordinary citizens brought people power into the policymaking process That power suggests Chen may also presage China s constitutional evolution toward a democratic form of government

China's Transition Andrew James Nathan, 1997 With more than one billion people China represents both an ocean of economic opportunity and a frustrating backwater of continuing brutal political repression What are the prospects for democratic evolution in a nation with one of the world's poorest human rights records How have other nations responded to China since the recent dramatic opening of its economic system and how should they respond in the future These are some of the most important questions confronting both the United States and the international community On democracy human rights and the move to integrate China into the international economy on Mao Zedong's regime and the reform since his death and on the Taiwan experiment and Hong Kong's reintegration with China Nathan offers an accessible introduction to the intricate web of contemporary Chinese politics and China's changing place in the global system
