Space to Grow Matthew Weinzierl, Brendan Rosseau, 2025-02-25 Your guide using the compelling stories of changemakers and the tools of economics to the transformation and future possibilities of the business and economics of space Space is a place of unparalleled possibility for humanity and it's undergoing a revolution A wave of companies led by gutsy entrepreneurs is unlocking opportunities that fire the imagination and open up new business models No it's not hotels on Mars or day trips to orbit yet but it's an awe inspiring transformation driven by innovative technologies creative approaches hard work and for the first time market forces Above all this revolution is uncovering the simple but unfamiliar truth that space is a place a place where countries markets and each of us can play a vital role in realizing some of our biggest boldest dreams But we won't succeed through dreams alone The space economy is just that an economy governed by the same laws of supply and demand that apply here on Earth The authors who teach a highly popular course on the topic at Harvard Business School bring the revolution in space to life through players you know like SpaceX and Blue Origin and many you may not like Astroscale founded by a Japanese IT executive who quit his job to start a company to clean up space debris They also bring to bear fundamental tools from economics to understand how the market in space is forming how it's fast becoming a source of value for businesses across industries and for society as a whole and how we can best ensure that its growth benefits us all With clarity and rigor Weinzierl and Rosseau get past the breathless hype to

explain what's real, what's not, what comes next and how you can be part of it

The Epic Structure of Space 1999 John K. Balor, 2018-02-18 This book contains transcripts from Online Alpha discussions where the epic and narrative structure of SPACE 1999 is being discussed by comparing episodes with themes, characters and elements of plot from the Homeric Odyssey and Lewis Carroll's stories about Alice. The discussion is motivated by questions raised in the scholarly literature and earlier Online Alpha debates about how to make sense of SPACE 1999 from the viewpoint of critical theory. The book has been developed on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at www.lulu.com

The Space of the World Nick Couldry, 2024-09-17 Over the past thirty years, humanity has made a huge mistake. We handed over to big tech decisions that have allowed them to build what has become our space of the world: the highly artificial space of social media platforms where much of our social life now unfolds. This has proved reckless and has huge social consequences. The toxic effects on social life, young people's mental health and political solidarity are well known, but the key factor underlying all this has been missed: the fact that humanity allowed business to construct our space of the world at all and then exploit it for profit. In the process, we ignored two millennia of political thought about the conditions under which a healthy or even a non-violent politics is possible. We endangered the one resource that is in desperately short supply in the face of catastrophic climate change: solidarity. Is human solidarity possible in a world of continuous digital connection and commercially managed platforms, and what if it isn't? In the first book of his trilogy *Humanising the Future*, Nick Couldry offers a radical new vision of how to design our digital spaces so that they build rather than erode both solidarity and community. This trenchant and vividly written book stresses that we cannot afford not to care for our space of the world. We need to rebuild it together.

Space, Mobility, and Crisis in Mega-Event Organisation Rodanthe Tzanelli, 2022-11-25 This book advances an alternative critical posthumanist approach to mega-event organisation, taking into account both the new and the old crises which humanity and our planet face. Taking the delayed Tokyo 2020 Olympic Games as a case study, Tzanelli explores mega-event crisis and risk management in the era of extreme urbanisation, natural disasters, global pandemic and technoscientific control. Using the atmospheric term 'irradiation' as a technology of glamour and transparency, as well as bodily penetration by harmful agents, the book explores this epistemological statement diachronically via Tokyo's relationship with Western forms of domination and synchronically the city as a global cultural-political player but victim of climate catastrophes. It presents how the Olympic enterprise's flattening of indigenous environmental place-making rhythms and the scientisation of space and place in the Anthropocene lead to reductionisms harmful for a viable programme of planetary recovery. An experimental study of the mega-event is enacted which considers the researcher's analytical tools and the styles of human and non-human mobility during the mega-event as reflexive gateways to forms of posthuman flourishing. Crossing and bridging disciplinary boundaries, the book will appeal to any scholar interested in mobilities theory, event and environment studies, sociology of knowledge and cultural globalisation.

Humanitarian Space and International Politics Hikaru Yamashita, 2017-07-05 The creation of safe areas poses a number of difficult challenges to the spatial and normative organization of contemporary international politics As a result academics practitioners and NGOs alike will find the case studies in this informative book essential reading Hikaru Yamashita firstly looks at the case of northern Iraq after the first Iraqi war where safe areas represented a major departure from the conventional notion The different understandings of the Srebrenica safe areas especially with regard to the role of security are also assessed to ascertain how they eventually destroyed this humanitarian space A much needed account of the extent to which humanitarian space intended as shelter in response to Rwandan genocide consequently destabilized the area and provided cover for the genocideurs is additionally provided This well researched book through the prism of safe areas allows a measured assessment to be made of the place of human rights and humanitarianism in the contemporary world

Space Oddities Joe Cuhaj, 2022-08-15 Nothing captivates the human imagination like the vast unknowns of space Ancient petroglyphs present renderings of the heavens proof that we have been gazing up at the stars with wonder for thousands of years Since then mankind has systematically expanded our cosmic possibilities What were once flights of fancy and dreams of science fiction writers have become nearly routine a continuous human presence orbiting the Earth probes flying beyond our solar system and men walking on the moon NASA and the Russian space program make traveling to the stars look easy but it has been far from that Space travel is a sometimes heroic sometimes humorous and always dangerous journey fraught with perils around every corner that most of us have never heard of or have long since forgotten Space Oddities brings these unknown offbeat and obscure stories of space to life From the showmanship and bravado of the earliest known space fatality German Max Valier to the first ever indictment under the Espionage Act on an Army officer who leaked secrets concerning the development of early U S rockets and the story of a single loose bolt that defeated the Soviet Union s attempt to beat America to the moon Author Joe Cuhaj also sheds light on the human aspects of space travel that have remained industry secrets until now how the tradition of using a musical playlist to wake astronauts up began fascinating tales about inventions like the Fischer Space Pen Omega watches and even Tang breakfast drink In addition to fun and entertaining space trivia Space Oddities also features stories of the profound impact that space travel has had on challenges right here at home like the effort by civil rights leaders and activists in the 1960s to bring the money from the space program back home to those in need on Earth NASA s FLATs First Lady Astronaut Training program and the 13 women who were selected to become astronauts in 1960 but were denied a chance at flying even after successfully completing the rigorous astronaut training program and the animals who many times sacrificed their lives to prove that man could fly in space Filled with rare and little known stories Space Oddities will bring the final frontier to the homes of diehard space readers and armchair astronauts alike

Space Expansionism and Criminology Dawn L. Rothe, Victoria E. Collins, 2025-02-18 We have entered a recent zeitgeist the era of the new space age driven by billionaires technological advancements and a few dominating state powers

While the race to space may be said to offer new opportunities for humanity we ask is it predicated on the same logics and historical patterns of the past This question guides our approach and critical assessment of human expansionism into space

Space Expansionism and Criminology The Emerging Terrain of Crime Harm and Violence offers readers a critical analysis of space expansionism and today s race to space that has come to define our contemporary era Taking a retrospective and prospective approach we delve into the choices being made the justifications being offered and those excluded from the hegemonic discourse of the benefits of humans as extraplanetary beings

Space Expansionism and Criminology includes chapters on the historical roots of today s space race weaponization and realpolitik space junk and debris space mining and resource extrapolation the burgeoning space tourism market the manufacturing of space nostalgia from the 1950s through today and efforts towards and claims making for space colonization to save Earth and humanity

Cosmos 1999 - The Third Year of Space 1999 John K. Balor, 2019-07-10 What does Gerry Anderson s television series SPACE 1999 have in common with Carl Sagan s award winning television documentary COSMOS Not very much one might expect but this book documents an Online Alpha discussion where fans of the science fiction series discuss and debate differences and similarities from a wide range of perspectives some of them arguing that two series may be so closely connected that it might be natural to think of COSMOS as the third year of SPACE 1999 This book is written on an idealistic basis It is sold at the lowest price the publisher was willing to accept A free e book version can be downloaded at www.lulu.com

Salyut - The First Space Station Grujica S. Ivanovich, 2008-10-22 This remarkable book gives a comprehensive account of the longest manned space mission of the time It details for the first time the people involved and the crews assigned to operate the first space station Salyut The book portrays the selection of the crews dramatic flights and tragedy of Soyuz 11 Biographies of the Soyuz 11 cosmonauts are published for the first time in English The book relates discussions between the key personnel and investigates the causes of the tragedy The book ends with memories of all those affected by the DOS program and the tragedy of Soyuz 11 and looks forward to a continuation of the historic mission of Salyut
