Space Weapons:

Space Weapons Rip Bulkeley, Graham Spinardi, 1986-01-01 A clear and lively account of the space weapons issue The authors examine all aspects of the Strategic Defense Initiative proposal its historical background current and forthcoming technologies and international political implications The book is divided into three main sections The first part describes the historical development of space weapons technology from the 1920s to the present day The second part provides a detailed technical assessment of the anti missile systems being pursued as part of the Strategic Defense Initiative It also considers the countermeasures to SDI that are currently in existence or are being developed by the United States and the Soviet Union The third part examines the international political and strategic implications of SDI and their probable consequences for arms control policies

Space Weapons Earth Wars Robert Preston, Dana J. Johnson, Sean J. A. Edwards, Michael D. Miller, Calvin Shipbaugh, 2002-02-13 This overview aims to inform the public discussion of space based weapons by examining their characteristics potential attributes limitations legality and utility The authors do not argue for or against space weapons nor do they estimate the potential costs and performance of specific programs but instead sort through the realities and myths surrounding space weapons in order to ensure that debates and discussions are based on fact

Controlling Space Weapons United States. Congress. Senate. Committee on Foreign Relations, 1983 **Space Weapons and International Security** Bhupendra Jasani, 1987 The efforts of the United States to develop defences against ballistic missiles the Strategic Defense Initiative is one of the most hotly debated topics of our time This authoritative book contributes to the debate by presenting th searching and wide ranging views of twenty six international experts on the technical legal political and military aspects of space weapons They address such questions as What are the technological promises and problems of strategic defence What effects will SDI have on the arms race or on deterring nuclear war How do China India and Japan perceive SDI What can be done to guard international stability These papers which express every range of opinion on SDI from an unqualified approval to total scepticism are prefaced by an overview by the editor of the volume

Space Weapons and U.S. Strategy Paul B. Stares, 2021-01-26 This book first published in 1985 analyses the factors that have shaped the militarization of space By examining in great detail the determinants of U S policy it explains why for over 25 years space did not become the scene of an arms race and why this began to change in the late 1970s Both superpowers did however develop a limited anti satellite capability in the 1960s and these programmes are also discussed

China, Space Weapons, and U.S. Security Bruce W. MacDonald, 2008 MacDonald recommends options and policies that will promote options and policies that will promote American security interests in space He argues that the U S needs to take priority defensive military space measures to offset potential Chinese anti satellite and related capabilities

Air & Space Power Journal sum 04 ,

Sabre Rattling in Space Ahmad Khan, Eligar Sadeh, 2024-12-13 This book offers historical and theoretical context of the path followed by States from space militarization to weaponization and deconstructs traditional security paradigm myths to prove that a paradigm shift has been brought because of deadly space weapons developed by major space powers It reconciles that the strategic distrust between two leading space competitors U S and China has prompted them to pursue counter space capabilities The ripple effect of this troubling relation in space is not limited at the global level but has witnessed a trickledown effect on regional security In relation to this the book offers details of the Indian space program including its military space ambitions and provides information about Pakistan s objectives in space It offers an overview of challenges to international space governance and how the structural flaws help states to aggressively follow a path toward space weaponization Additionally it discusses the UN negotiating arms control measures in space and the politics of states not to negotiate prevention of an arms race in outer space The book is a useful contribution to space security from both traditional and contemporary approaches covering history theory and application It provides an academic as well as practical approach carrying appeal for professionals experts opinion makers industry academics teachers policy makers politicians and masses from other walks of life who are interests in space security

Weaponisation of Space: An Inevitable Reality and Plausible Fallout Group Captain PA Patil, 2017-01-15 Militarily use of spacebased assets when integrated with operations assumes importance as one of the many force multipliers As on date outer space is being extensively used by the armed forces for varied services which include navigation intelligence surveillance reconnaissance environmental monitoring and advance warning The command and control in today s netcentric environment also depends on space resources Thus the use of outer space with spacebased assets in support of military operations leads to the deduction that space as a medium stands militarised Of late many of the dominant nations have developed or are expanding capabilities to attack the spacebased assets of potential adversaries to disrupt command and control structures Countries like the US and China are contesting for space supremacy and working towards developing spacebased weapons capable of being delivered from spacebased platforms These developments in turn are infusing a sense of insecurity amongst other international players including India and have raised concerns worldwide Development of spacebased weapons by any state has the potential to ignite a new arms race in space as many countries now possess the wherewithal for launching spacebased assets capable of carrying the required payloads Thus from the present capability of militarisation of space we seem to be graduating towards weaponisation of space As outer space has been designated as one of the global commons any sort of deployment or employment of space weapons raises concerns and any use of spacebased weapons will have unpleasant cascading effects In the absence of any international curb or law on space weaponisation it continues to be a conceptual possibility as well as an empirical reality
