Lord, 1987 This volume presents a history of the Spacelab program which was the first time that the United States space program worked with a foreign agency to design and develop a major element of a manned space vehicle *NASA Historical Data Book: NASA launch systems, space transportation, human spaceflight, and space science, 1979-1988* Jane Van Nimmen, 1988

Partnership in Space Ben Evans, 2013-10-04 April 12 2011 was the 50th Anniversary of Yuri Gagarin's pioneering journey into space To commemorate this momentous achievement Springer Praxis has produced a mini series of books that reveals how humanity's knowledge of flying working and living in space has grown in the last half century *Partners in Space* focuses on the early to late 1990s a time in the post Soviet era when relations between East and West steadily though not without difficulty thawed and the foundations of real harmony and genuine co operation were laid for the first time with Shuttle Mir and the International Space Station This book explores the events which preceded that new era including the political demise of Space Station Freedom and the consequences of the fall of the Soviet Union on a once proud human space program It traces the history of the Partnership through the often traumatic times of Shuttle Mir and closes on the eve of the launch of Zarya the first component of today's International Space Station **Spaceflight and the Myth of Presidential Leadership** Roger D. Launius, Howard E. McCurdy, 1997 Setting the tone for the collection NASA chief historian Roger D Launius and Howard McCurdy maintain that the nation's presidency had become imperial by the mid 1970s and that supporters of the space program had grown to find relief in such a presidency which they believed could help them obtain greater political support and funding Subsequent chapters explore the roles and political leadership vis vis government policy of presidents Eisenhower Kennedy Johnson Nixon Ford Carter and Reagan *Resources in education* , 1988-07

Spaceship Earth in the Environmental Age, 1960-1990 Sabine Höhler, 2015-10-06 The idea of the earth as a vessel in space came of age in an era shaped by space travel and the Cold War Höhler's study brings together technology science and ecology to explore the way this latter day ark was invoked by politicians environmentalists cultural historians writers of science fiction and many others across three decades **Spaceflight in the Shuttle Era and Beyond** Valerie Neal, 2017-01-01 An exploration of the changing conceptions of the iconic Space Shuttle and a call for a new vision of spaceflight The thirty years of Space Shuttle flights saw contrary changes in American visions of space Valerie Neal who has spent much of her career examining the Space Shuttle program uses this iconic vehicle to question over four decades worth of thinking about and struggling with the meaning of human spaceflight She examines the ideas images and icons that emerged as NASA Congress journalists and others sought to communicate rationales for or critiques of the Space Shuttle missions At times concurrently the Space Shuttle was billed as delivery truck and orbiting science lab near Earth station and

space explorer costly disaster and pinnacle of engineering success The book's multidisciplinary approach reveals these competing depictions to examine the meaning of the spaceflight enterprise Given the end of the Space Shuttle flights in 2011 Neal makes an appeal to reframe spaceflight once again to propel humanity forward
