Spades Pruning Hooks:

Ground-Work Hillary Eklund, 2017-03-28 How does soil as an ecological element shape culture With the sixteenth century shift in England from an agrarian economy to a trade economy what changes do we see in representations of soil as reflected in the language and stories during that time This collection brings focused scholarly attention to conceptions of soil in the early modern period both as a symbol and as a feature of the physical world aiming to correct faulty assumptions that cloud our understanding of early modern ecological thought that natural resources were then poorly understood and recklessly managed and that cultural practices developed in an adversarial relationship with natural processes Moreover these essays elucidate the links between humans and the lands they inhabit both then and now The Insula of the Menander at Pompeii Penelope M. Allison, 2007-01-04 This book contains catalogues analyses photographs and drawings of some 2 000 archaeological artefacts excavated from the Insula of the Menander in Pompeii The catalogues and analyses are organized by provenance buildings rooms and location within rooms so that the reader can understand the artefacts as household assemblages The functions of artefacts and groups of artefacts are discussed as are the Latin names which are often given to these artefacts and the relationships of these assemblages to the state of occupancy of the buildings in the Insula during the last years of Pompeii This study therefore provides a wealth of information not only on the range and use of artefacts in Pompeian houses but also on Roman artefacts and Roman society more generally **A Search for an Infidel** Jenkin Lloyd Jones, 1901 **The Insula of the Menander at Pompeii** Roger Ling, Penelope M. Allison, Paul R. Arthur, 1997 The Insula of the Menander is one of the most completely excavated city blocks in Pompeii with buildings ranging from small shops to large aristocratic houses This volume the third in a series of five volumes examining the Insula is the first ever comprehensive study of the contents of Pompeian houses and buildings within their original contexts It provides a great insight into living conditions in Pompeii during the final years of the city *The Christian Examiner*, 1866 *An Encyclopaedia of Agriculture ...
