The Malaspina Expedition 1789-1794 / ... / Volume II / Panama to the Philippines Andrew David, Felipe Fernández-Armesto, Glyndwr Williams, 2018-12-07 Among the voyages of exploration and surveying in the late 18th century that of Alejandro Malaspina best represents the high ideals and scientific interests of the Enlightenment Italian born Malaspina entered the Spanish navy in 1774 In September 1788 he and fellow officer Jos Bustamante submitted a plan to the Ministry of Marine for a voyage of survey and inspection to Spanish territories in the Americas and Philippines The expedition was to produce hydrographic charts for the use of Spanish merchantmen and warships and to report on the political economic and defensive state of Spain s overseas possessions The plan was approved and in July 1789 Malaspina and Bustamante sailed from Cádiz in the purpose built corvettes Descubierta and Atrevida On board the vessels were scientists and artists and an array of the latest surveying and astronomical instruments The voyage lasted more than five years On his return Malaspina was promoted Brigadier de la Real Armada and began work on an account of the voyage in seven volumes to dwarf the narratives of his predecessors in the Pacific such as Cook and Bougainville Among much else it would contain sweeping recommendations for reform in the governance of Spain s overseas empire But Malaspina became involved in political intrigue In November 1795 he was arrested stripped of his rank and sentenced to life imprisonment Although released in 1803 Malaspina spent the last seven years of his life in obscure retirement in Italy He never resumed work on the great edition and his journal was not published in Spain until 1885 Only in recent years has a multi volume edition appeared under the auspices of the Museo Naval Madrid that does justice to the achievements of what for long was a forgotten voyage This second volume in a series of three contains Malaspina s diario or journal for the first time in English translation and with commentary It covers the period from 15 December 1790 to 15 November 1792 when he visited the Pacific coasts of Central and North America as far north as Alaska before crossing the ocean to the Philippines Other texts include the apocryphal voyage of Ferrer Maldonado through the Strait of Anian which

Williams,2023-07-21 *Buccaneers Explorers and Settlers* studies how during the long 18th century British incursions into the

Pacific transformed Europe's knowledge of that great ocean. Buccaneers devastated Spanish settlements and shipping in the South Sea and the accounts by Dampier and his companions of their exploits became best sellers. Anson's circumnavigation carried on the tradition of commerce raiding but it represented the beginnings of a more official interest in the Pacific and its resources. Later in the 18th century the hopes of speculative geographers that unknown continents and sea passages existed in the Pacific prompted a series of expeditions by Cook and his contemporaries. New peoples were discovered as well as new lands and the voyages led to changing perceptions of their lifestyles. Exploration was followed by trade and settlement in which Cook's associates such as Banks played a leading part. Before the end of the century there were British settlements in New South Wales. Nootka Sound had become a centre of international dispute and across the Pacific traders, whalers and missionaries were following the tracks of the explorers.

Islands of Truth Daniel Clayton, 2011-11-01 In *Islands of Truth* Daniel Clayton examines a series of encounters with the Native peoples and territory of Vancouver Island in the late eighteenth and early nineteenth centuries. Although he focuses on a particular region and period, Clayton also meditates on how representations of land and people and studies of the past serve and shape specific interests and how the dawn of Native Western contact in this part of the world might be studied 200 years later in the light of ongoing struggles between Natives and non-Natives over land and cultural status. Between the 1770s and 1850s the Native people of Vancouver Island were engaged by three sets of forces that were of general importance in the history of Western overseas expansion: the West's scientific exploration of the world in the Age of Enlightenment, capitalist practices of exchange and the geopolitics of nation-state rivalry. *Islands of Truth* discusses these developments, the geographies they worked through and the stories about land, identity and empire stemming from this period that have shaped understanding of British Columbia's past and present. Clayton questions premises underlying much of present B.C. historical writing, arguing that international literature offers more fruitful ways of framing local historical experiences. *Islands of Truth* is a timely provocative and vital contribution to post-colonial studies.

Bárbaros David J. Weber, 2008-10-01 Two centuries after Cortés and Pizarro seized the Aztec and Inca empires, Spain's conquest of America remained unfinished. Indians retained control over most of the lands in Spain's American empire. Mounted on horseback, savvy about European ways and often possessing firearms, independent Indians continued to find new ways to resist subjugation by Spanish soldiers and conversion by Spanish missionaries. In this panoramic study, David J. Weber explains how late eighteenth-century Spanish administrators tried to fashion a more enlightened policy toward the people they called *barbaros* or savages. Even Spain's most powerful monarchs failed, however, to enforce a consistent, well-reasoned policy toward Indians. At one extreme, powerful independent Indians forced Spaniards to seek peace, acknowledge autonomous tribal governments and recognize the existence of tribal lands, fulfilling the Crown's oft-stated wish to use gentle means in dealing with Indians. At the other extreme, the Crown abandoned its principles, authorizing bloody wars on Indians when Spanish officers believed they could defeat them. Power, says Weber, was more than the power of

ideas determined how Spaniards treated savages in the Age of Enlightenment **Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America** Robin Inglis, 2008-04-02 The Northwest Coast of America ranging from northern California through Oregon Washington and British Columbia all the way up to Alaska was the last temperate coastline to be placed on the world map First visited by Russians in 1741 and thought to contain a navigable passage between the Pacific and the Atlantic it was systematically revealed during an intense period of exploratory and commercial activity from the 1770s to the 1790s Subsequently the imperial ambitions of Russia Spain and Britain and an assumption of manifest destiny by the United States led to further exploration and ensured that the region would become disputed territory before national boundaries were determined in the mid 19th century The Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America tells of the heroic endeavors and remarkable achievements the endless speculation about a northwest passage and the fighting and manipulation for commercial advantage that surrounded this terrain This is done through an introductory essay a detailed chronology an extensive bibliography modern maps and selected historical maps and drawings and over 400 cross referenced dictionary entries Entries cover the native people encountered the scientists and artists who left an invaluable documentary and visual record of people places flora and fauna the numerous voyages taken by men such as Vitus Bering James Cook Juan Francisco de la Bodega y Quadra and George Vancouver overland expeditions like those of Alexander Mackenzie Simon Fraser Meriwether Lewis and William Clark and David Thompson and maritime fur traders including George Dixon Grigorii Shelikhov Robert Gray and William Sturgis No other dictionary exists that is dedicated solely to the coverage of this region
