Spatial Foundations Of Urbanism:

Spatial Foundations of Urbanism Dean S. Rugg, 1979

Spatial Foundations of Urbanism Dean S. Rugg, 1972

Urban Geography in America, 1950-2000 Brian J.L Berry, James Wheeler, 2014-05-01 Urban Geography in America offers a comprehensive historiography of this major field. Compiling the best essays from the flagship journal Urban Geography, it shows the evolution of the field from the 1950s to 2000 as it shifted from data-driven social science modeling in the 1960s to the more critical perspectives of the 1970s to postmodernism in the 1980s to feminism and globalization in the 1990s. It covers all the major trends and figures and features some of the most important names in the field. Ultimately, this will be a necessary reference for all scholars in the field and all graduate students taking introductory courses and preparing for their comprehensive exams.

The Urbanism of Exception Martin J. Murray, 2017-03-10 This book argues that understanding global urbanism in the twenty-first century requires us to cast our gaze upon vast city regions without an urban core.

Socially Restorative Urbanism Kevin Thwaites, Alice Mathers, Ian Simkins, 2013-08-22 The need for a human-orientated approach to urbanism is well understood, and yet all too often this dimension remains lacking in urban design. In this book, the authors argue for and develop socially restorative urbanism, a new conceptual framework laying the foundations for innovative ways of thinking about the relationship between the urban spatial structure and social processes to re-introduce a more explicit people-centred element into urban place-making and its adaptation. Focusing on this interplay between humans and the built environment, two new concepts are developed: the transitional edge, a socio-spatial concept of the urban realm, and Experiemics, a participative process that acts to redress imbalances in territorial relationships defined in terms of the awareness of mine, theirs, ours, and yours. MTOY. In this way, Socially Restorative Urbanism shows how professional practice and community understanding can be brought together in a mutually interdependent and practical way. Its theoretical and practical principles are applicable across a wide range of contexts concerning human benefit through urban environmental change and experience, and it will be of interest to readers in the social sciences and environmental psychology as well as the spatial planning and design disciplines.

Architecture and Urbanism in the British Empire G. A. Bremner, 2016-10-13 Throughout today's postcolonial world, buildings, monuments, parks, streets, avenues, entire cities even remain as witness to Britain's once impressive if troubled imperial past. These structures are a conspicuous and near inescapable reminder of that past, and therefore the built heritage of Britain's former colonial empire is a fundamental part of how we negotiate our postcolonial identities, often lying at the heart of social tension and debate over how that identity is best represented. This volume provides an overview of the architectural and urban transformations that took place across the British Empire between the seventeenth and mid-twentieth centuries. Although much research has been carried out on architecture and urban planning in Britain's empire in recent decades, no single comprehensive reference source exists. The essays compiled here remedy this deficiency. With its extensive chronological and regional coverage by leading scholars in the field, this

volume will quickly become a seminal text for those who study teach and research the relationship between empire and the built environment in the British context It provides an up to date account of past and current historiographical approaches toward the study of British imperial and colonial architecture and urbanism and will prove equally useful to those who study architecture and urbanism in other European imperial and transnational contexts The volume is divided in two main sections The first section deals with overarching thematic issues including building typologies major genres and periods of activity networks of expertise and the transmission of ideas the intersection between planning and politics as well as the architectural impact of empire on Britain itself The second section builds on the first by discussing these themes in relation to specific geographical regions teasing out the variations and continuities observable in context both practical and theoretical

Global Modernities Mike Featherstone, Scott Lash, Roland Robertson, 1995-06-05 *Global Modernities* is a sustained commentary on the international character of the most microcosmic practices It demonstrates how the global increasingly informs the regional so deconstructing ideas like the nation state and national sovereignty The spatialization of social theory hybridization and bio politics are among the critical issues discussed

The SAGE Handbook of Architectural Theory C. Greig Crysler, Stephen Cairns, Hilde Heynen, 2012-01-10 The SAGE Handbook of Architectural Theory documents and builds upon some of the most innovative developments in architectural theory over the last two decades Bringing into dialogue a range of geographically institutionally and historically competing positions the book examines and explores parallel debates in related fields The book is divided into eight sections Power Difference Embodiment Aesthetics Pleasure Excess Nation Spectacle Modernity History Memory Tradition Design Practice Production Technology Science Virtuality Nature Landscape Sustainability City Metropolis Territory Creating openings for future lines of inquiry and establishing the basis for new directions for education research and practice the book organizes itself around specific case studies to provide a critical interpretive and speculative enquiry into the relevant debates in architectural theory A methodical authoritative and comprehensive addition to the literature the Handbook is suitable for academics researchers and practitioners in architecture urban geography cultural studies sociology and geography
