Beatific Enjoyment in Medieval Scholastic Debates examines the religious concept of enjoyment as discussed by scholastic theologians in the Latin Middle Ages Severin Kitanov argues that central to the concept of beatific enjoyment *fruitio beatifica* is the distinction between the terms enjoyment and use *frui et uti* found in Saint Augustine's treatise *On Christian Learning* Peter Lombard a twelfth century Italian theologian chose the enjoyment of God to serve as an opening topic of his *Sentences*

and thereby set in motion an enduring scholastic discourse Kitanov examines the nature of volition and the relationship between volition and cognition He also explores theological debates on the definition of enjoyment whether there are different kinds and degrees of enjoyment whether natural reason unassisted by divine revelation can demonstrate that beatific enjoyment is possible whether beatific enjoyment is the same as pleasure whether it has an intrinsic cognitive character and whether the enjoyment of God in heaven is a free or un free act Even though the concept of beatific enjoyment is essentially religious and theological medieval scholastic authors discussed this concept by means of Aristotle s logical and scientific apparatus and through the lens of metaphysics physics psychology and virtue ethics Bringing together Christian theological and Aristotelian scientific and philosophical approaches to enjoyment Kitanov exposes the intricacy of the discourse and makes it intelligible for both students and scholars Nature and Nature's God Daniel Shields,2023-05-26

Aquinas first proof for God s existence is usually interpreted as a metaphysical argument immune to any objections coming from empirical science Connections to Aquinas own historical understanding of physics and cosmology are ignored or downplayed Nature and Nature s God proposes a natural philosophical interpretation of Aquinas argument more sensitive to the broader context of Aquinas work and yielding a more historically accurate account of the argument Paradoxically the book also shows that on such an interpretation Aquinas argument is not only consistent with modern science but actually confirmed by the history of science from classical mechanics through 19th century thermodynamics to contemporary cosmology The first part of the book considers Aquinas argument in its historical context exploring the key principles that everything in motion is moved by something else and that an infinite regress of causes is impossible The structure of the First Way is analyzed and the argument is connected both with Aquinas Third Way a new interpretation of which is also proposed and Aquinas second proof from motion in the Summa contra Gentiles To complete the account of what natural philosophy prior to metaphysics can demonstrate about God a chapter on Aquinas teleological argument the Fifth Way is also included The second part of the book tracks the history of modern science from Copernicus to today showing how Aquinas argument fared at each major turn The first chapter shows how Newton s understanding of inertia and conservation of momentum supports the idea that motion cannot continue forever without God s causality and integrates a modern understanding of inertia and gravity with the principles of Thomistic natural philosophy The second chapter considers the first and second laws of thermodynamics showing how they too support Aquinas contention that motion cannot continue forever without God s causality This chapter also discusses statistical mechanics and contemporary cosmology demonstrating that science continues to support Aquinas unmoved mover argument The final chapter turns to modern biology as well as cosmological fine tuning to show that modern science also continues to support Aquinas teleological argument The result is not only a satisfying defense of Aquinas natural philosophical proofs for God s existence but a primer on the broader project of integrating Thomistic natural philosophy with modern science The Routledge Research Companion to Shakespeare and

Classical Literature Sean Keilen, Nick Moschovakis, 2017-03-31 In this wide ranging and ambitiously conceived Research Companion contributors explore Shakespeare's relationship to the classic in two broad senses The essays analyze Shakespeare's specific debts to classical works and weigh his classicism's likeness and unlikeness to that of others in his time they also evaluate the effects of that classical influence to assess the extent to which it is connected with whatever qualities still make Shakespeare himself a classic arguably the classic of modern world literature and drama The first sense of the classic which the volume addresses is the classical culture of Latin and Greek reading translation and imitation Education in the canon of pagan classics bound Shakespeare together with other writers in what was the dominant tradition of English and European poetry and drama up through the nineteenth and even well into the twentieth century Second and no less central is the idea of classics as such that of books whose perceived value exceeding that of most in their era justifies their protection against historical and cultural change The volume's organizing insight is that as Shakespeare was made a classic in this second antiquarian sense his work's reception has more and more come to resemble that of classics in the first sense of ancient texts subject to labored critical study by masses of professional interpreters who are needed to mediate their meaning simply because of the texts growing remoteness from ordinary life language and consciousness The volume presents overviews and argumentative essays about the presence of Latin and Greek literature in Shakespeare's writing They coexist in the volume with thought pieces on the uses of the classical as a historical and pedagogical category and with practical essays on the place of ancient classics in today's Shakespearean classrooms The Encyclopedia of Christianity Erwin Fahlbusch, Geoffrey William Bromiley, 1999 Containing more than 300 articles covering the alphabetical entries P Sh this book also includes articles on significant topics ranging from Paul political theology and the Qur'an to religious liberty salvation history and scholasticism **The Cyclopædia of Education** Henry Kiddle, Alexander Jacob Schem, 1876

Boulter, 2022-02-03 Writing his Habilitationsschrift as a young man in the late 1950s future Pontiff Joseph Ratzinger argues that when St Bonaventure composed his Collationes in Hexaemeron in the spring of 1273 not since St Augustine's De Civitate Dei contra Paganos had the world seen such a ground breaking work on the logos of history Indeed for Ratzinger's Bonaventure history is first philosophy The thirteenth century Franciscan rails against the widespread assumption rooted the newly rediscovered Aristotle of history's unintelligibility For Bonaventure mythos mediates the difference between science and history yielding a

non positivistic approach to the latter Building on the dynamics of Plato's Line Boulter show that the days of creation narrated by Bonaventure structure both history and thought Because like a story it has beginning and end history as a whole can be grasped Hence eschatological knowledge of the end of the world is possible Yet this work also shows how the false progress myths of modernity are counterfeit versions of true spiritual advancement of the kind embodied by saints such as Francis and Bonaventure himself What is the logos of history It turns out that it is mythos World History Encyclopedia [21 volumes] Alfred J.
