Learning and Personality William K. Lawrence, 2015-09-04 How does an introverted student with a visual or auditory learning preference find success in a classroom built for extroverted kinesthetic learners While student discussion in the classroom is invaluable it also presents an issue for many students not only in how they feel in the class setting but in how they ultimately learn Given the emerging understanding of differing personality types and learning preference it is questionable whether all students are served by socially active methods that mandate students to speak Learning and Personality documents how introverted and intrapersonal students are being subjected to uncomfortable situations in schools today This book focuses on the classroom experience of students who have been identified as learning best through reflection and observation The author uses an American college writing class as the setting to explore the in

depth experience of common first year students The results of this primary qualitative study reveal a glaring conflict within mainstream educational theory With more than five years of research and over one hundred references cited from sources that span two centuries this book calls attention to a mass misunderstanding of introversion as well as the effects of instructional methods that appeal to only one type of personality

ENDORSEMENTS Hindsight famously brings clarity And much of what happened after the fall of the Berlin Wall and the collapse of the Soviet Union has now been correctly deeded over to historians Nonetheless we ignore that history at our peril The contributors to this volume show that carefully textured and historically attuned education research generates deep insights into ongoing transformations and the political cultural social and economic structures relations and practices that do the work of producing margins and centers in the first place Noah W Sobe Loyola University Chicago

for years to come Duishon Shamatov Nazarbayev University Kazakhstan The challenge of moving Central Asia from the borders of the Soviet Empire to the world s center is the focus of the discussions in Globalization on the Margins The transition to the Western models of education was happening in the context of major paradigm shift which entire humanity was experiencing and which could be described as the arrival of the new post industrial civilization During this process Central Asian countries have been pushed to the margins because their contribution to the wealth of the new world know how was much less pronounced than that of their Western neighbours Therefore investment into the research that contributes to local knowledge production seems a natural solution to the problem All the contributors to this book have a vast experience in the region and many of their observations are thought provoking This is a very insightful and much needed book Elena Lenskaya Moscow School of Social and Economic Sciences Russia **The Essential College Professor** Jeffrey L. Buller, 2009-11-19 The Essential College Professor is about the how and why of being a faculty member today Based on the author s series of highly successful faculty development workshops each chapter deals concisely with the most important information college professors need at their fingertips when confronted by a particular challenge or faced with an exciting opportunity Written both as a comprehensive guide to an academic career and as a ready reference to be consulted whenever needed The Essential College Professor emphasizes proven solutions over untested theories and stresses what faculty members have to know now in order to be successful in their careers Each chapter is concluded by a short exercise that faculty members can perform to help them for instance completely revise a course by restructuring the syllabus and course materials bring new life to a research project by reframing it as a book proposal or grant application and so on
