Improving Foreign Language Teaching Ernesto Macaro,Suzanne Graham,Robert Woore,2015-09-16 Improving Foreign Language Teaching provides teachers and teacher trainers with a research based structure for the effective teaching and assessment of second languages As well as outlining a model for teacher development the book identifies and exemplifies eight key principles for effective language learning which can be used to guide curriculum design and decisions about classroom pedagogy Improving Foreign Language Teaching also presents practical activities related materials and guidance on how student progress can be monitored and recorded Based on the research of the authors and other international experts together with the work of a consortium established by the authors and teachers in a range of secondary schools the

book focusses on the development of language skills and communicative competence. It also proposes an assessment system which better reflects how learners progress in language learning than current models. Taking as its starting point the challenge of a curriculum in flux and complex pedagogical approaches, this book offers clear research informed guidance for effective planning, teaching and learning. It will be essential reading for all those concerned with the improvement of language learning and teaching in the secondary classroom.

Supporting the Learning of Chinese as a Second Language: Implications for Language Education Policy Joseph Lo Bianco, Elizabeth Ka Yee Loh, Mark Shiu-kee Shum, 2024-10-25. The research in this volume takes account of the context of policy promoting Chinese as a second language (CSL) in several countries and regions: Australia, East Asia and South East Asia, and the wider social context of multilingual and multicultural societies. Furthermore, this book reports results of two research studies which investigated how to develop effective strategies to promote learners' motivation and the motivational developments of adult learners in real life settings, helping to overcome gaps in this under-researched area. Findings reported in this book have been scientifically examined and found to be effective in enhancing the learners' CSL proficiency, increasing their learning motivation and addressing the need for a diversity of targeted approaches to CSL. Most are applicable across preschool to secondary levels. The theoretical grounding of this research work represents a new direction for research in teaching Chinese as a second language.

Early Language Learning in Context David Hayes, 2022-08-19. This book critically analyses early school foreign language teaching policy and practice, foregrounding the influence of the socioeducational and cultural context on how policies are implemented and assessing the factors which either promote or constrain their effectiveness. It focuses on four Asian contexts: Malaysia, South Korea, Sri Lanka and Thailand, while providing a discussion of policy and practice in Canada and Finland as a comparison. Concentrating on the state school sector, it criticises the worldwide trend for a focus on English as the principal or only foreign language taught in primary schools, founded on a rationale that widespread proficiency in English is important for future national success in a globalised economy. It maintains that the economic rationale is not only largely unfounded and irrelevant to the language learning experiences of young children, but also that the focus on English exacerbates system inequalities rather than contributing to their reduction. The book argues for a broader perspective on language learning in primary schools, one that values multilingualism and knowledge of regional and indigenous languages alongside a more diverse range of foreign languages. This book will appeal to educational policymakers, researchers and students interested in early foreign language learning in state educational systems worldwide.
