Learning Teaching from Experience Viv Ellis, Janet Orchard, 2014-01-16 What do teachers learn on the job And how if at all do they learn from experience Leading researchers from the UK Europe the USA and Canada offer international research based perspectives on a central problem in policy making and professional practice the role that experience plays in learning to teach in schools Experience is often weakly conceptualized in both policy and research sometimes simply used as a proxy for time in weeks and years spent in a school classroom The conceptualization of experience in a range of educational research traditions lies at the heart of this book exemplified in a variety of empirical and theoretical studies Distinctive perspectives to inform these studies include sociocultural psychology the philosophy of education school effectiveness the sociology of education critical pedagogy activism and action research However no one theoretical perspective can claim privileged insight into what and how teachers learn from experience rather this is a matter for a truly educational investigation one that is both close to practice and seeks to develop theory At a time when policy makers in many countries seek to make teacher education an entirely school based activity *Learning Teaching from Experience* offers an essential examination of the evidence base the traditions of inquiry and the limits of those inquiries **Junior College Teachers of Science, Engineering, and Technology, 1967: Experience and Employment Characteristics** Surveys & Research Corporation, 1969 *Re-imagining Professional Experience in Initial Teacher Education* Ange Fitzgerald, Graham Parr, Judy Williams, 2018-07-05 This book takes a fresh look at professional experience in initial teacher education in Australia Using collaborative narrative methodologies the authors critically explore the ways in which one faculty of education engages with schools industry the teaching profession and government policy to deliver an innovative professional experience program It

includes chapters offering new perspectives on more traditional practicums in schools as well as those reporting on exciting partnership initiatives where pre service teachers teacher educators and practitioners work together to teach and learn in new and mutually beneficial ways There is a particular focus on the professional learning of all stakeholders from across the professional experience program The book allows readers to gain a new understanding of the experiences and learning opportunities available to all stakeholders when a professional experience program makes a priority of boundary work relational work and identity work With the critical and creative power of narrative to convey what other research methodologies cannot it shows how one institution has developed a variety of innovative approaches and structures in response to on going debates on quality in teacher education the role of educational partnerships in teacher preparation and the personal and professional insights gained from such opportunities
